Asia-Pacific is expected to expand at a significant growth rate over the forecast period of 2021 to 2028 due to the high production and sales of luxury vehicles as well as the technological advancement.

Semi-Autonomous And Autonomous Vehicle Market Data Sources and Implied Research Methodology

PRIMARY RESEARCH: Once data collection is done through secondary research, primary interviews are conducted with different stakeholders across the value chain like manufacturers, distributors, ingredient/input suppliers, end customers and other key opinion leaders of the industry. Primary research is used both to validate the data points obtained from secondary research and to fill in the data gaps after secondary research.

SECONDARY RESEARCH: Secondary Research Information is collected from a number of publicly available as well as paid databases. Public sources involve publications by different associations and governments, annual reports and statements of companies, white papers and research publications by recognized industry experts and renowned academia etc. Paid data sources

include third party authentic industry databases.

EXPERT VALIDATION The market engineered data is verified and validated by a number of experts, both in-house and external.

MARKET ENGINEERING The market engineering phase involves analyzing the data collected, market breakdown and forecasting. Macroeconomic indicators and bottom-up and top-down approaches are used to arrive at a complete set of data points that give way to valuable qualitative and quantitative insights. Each data point is verified by the process of data triangulation to validate the numbers and arrive at close estimates.

REPORT WRITING/ PRESENTATION After the data is curated by the mentioned highly sophisticated process, the analysts start to write the report. Garnering insights from data and forecasts, insights are drawn to visualize the entire ecosystem in a single report.
