"We work with a storyboard and conceptualizes each shot to tell a story, one that is personal and special. Inspired by natural surroundings I bring in the colors, backdrops, materials, furniture and ambiance, reflecting the same. You will find the photos to be more candid, deep and vintage-like with solo pieces of wooden barrels, mini baby cribs, swing chairs, rustic rugs, pottery, and flower fences. As a part of a new trend, capturing the tiny details of your baby, like the small

hands of her little nose or small lips is effectively done by the team.. By capturing the small details, there are better images provided and it will be an attractive one for you and your baby. Use of massive lighting while taking pictures of your baby is to be taken care of; making sure the sensitivity of a newborn. Baby Shoot is time consuming but its rewarding at the end when you see the parent smile when they look at the photographs" says Yatish Jain a prominent baby photography from Bangalore.
