

# 6clicks Launches New Vulnerability Management Module Integrating GRC and Technical Assurance

*Import and manage your cybersecurity vulnerabilities, link with your information assets and associate risks and issues to better manage your cyber program.*

MELBOURNE, AUSTRALIA, August 15, 2022 /EINPresswire.com/ -- The latest release from 6clicks is their [vulnerability management](#) solution that bridges the traditional world of GRC and technical assurance. The

6clicks vulnerability management solution is for cybersecurity professionals, advisors and managed service providers (MSPs) looking for an integrated and more effective way to manage and communicate the holistic cybersecurity risk profile.

“

[vCISOs] can now understand what they're communicating, how the organization's risk is impacted by vulnerabilities, and how to prioritize [the vulnerabilities].”

*William Birchett*

Along with integrating data from leading [vulnerability scanning tools](#) from vendors like Qualys and Nessus, 6clicks also provides the opportunity to define custom mappings to easily import vulnerabilities from any system. Vulnerabilities with their associated CVEs are then automatically linked to assets and easily correlated with risks and issues for remediation and ongoing prioritization.

“Our vulnerability management module presents a huge opportunity for cybersecurity professionals and makes it so much easier to manage cybersecurity risk overall – converging technical assurance with risk, governance and compliance,”, Dr Heather Buker, Global CTO of 6clicks, explained.

As Jim Tiller, Global CISO at Nash Squared explained, “...risk is the bridge between GRC and vulnerability management.”

The 6clicks fully-integrated GRC platform makes this possible by providing business context in risk management terms around the vulnerabilities.

The partnership opportunity for advisors and MSPs

For cybersecurity advisors and MSPs, the vulnerability management module is an opportunity to provide a further integrated service delivery offering, including managed services or vCISO. Along with streamlining service delivery, there's a revenue-sharing opportunity as a 6clicks reseller or referral partner.

William Birchett, President of Logos Systems and part of the global vCISO network, explained that with 6clicks Vulnerability management, the opportunity for MSPs and those providing vCISO offering is huge. He says,

"[vCISOs] can now understand what they're communicating, how the organization's risk is impacted by vulnerabilities, and how to prioritize [the vulnerabilities]."

#### Pricing

Pricing for the 6clicks vulnerability management module is made available via 6clicks partners or directly. More information is available [here](#).

#### About 6clicks

Aside from being so fast to implement and easy to use, here's 6clicks is making waves in the market:

The diagram illustrates the 6clicks platform's workflow. At the top, it lists 'nessus' and 'Qualys' as 'Your vulnerability scanning tool'. The central hub is '6clicks', with the tagline 'Where vulnerabilities and GRC converge'. The workflow is represented by a circular path with four stages: 'Ingest' (top right), 'Link' (bottom right), 'Remediate' (bottom left), and 'Close' (top left). Each stage is connected to a corresponding module: 'Vulnerability Management' (top right), 'Information Asset Management' (bottom right), 'Issue & Risk Management' (bottom left), and 'Vulnerability Management' (top left). The 6clicks logo is prominently displayed at the bottom of the diagram.

Import and manage your cybersecurity vulnerabilities, link with your information assets and associate risks and issues to better manage your cybersecurity program.

**6clicks**

6clicks: on a mission to protect consumers by providing a platform that helps businesses and advisors demonstrate compliance, improve cybersecurity and reimagine risk.

Its [Hub & Spoke architecture](#) is designed from the ground up to support federated or distributed deployment, which is perfect for large enterprises, advisors, and MSPs.

Hailey, the 6clicks AI engine that takes seconds to perform compliance and policy gap analysis where it would otherwise take weeks, is a boon for compliance professionals.

Fully integrated content all baked into the platform. No need for 'uploads', external data feeds, or the issues due to lack of traceability.

As the name suggests, 6clicks makes it easy to manage risk and compliance in just 6 clicks. (Read more about this in the blog [The founder's story: How 6clicks was born and what's behind the name](#)). Designed for advisors and businesses, and powered by AI and integrated content, 6clicks is taking on giants like ServiceNow, OneTrust, RSA Archer, and Galvanize.
