nonalcoholic beverages, are all included. Apart from drugs, this industry touches every product designed for human consumption.

As a result of the current economic depression caused by the Covid-19 outbreak, consumers are seeking to save as much money as possible. Consumers are doing so in a variety of ways, including buying more generic things and cooking their own meals instead of going out. As a result, food processing companies are getting more creative in order to reduce the cost of goods sold, attract more customers, and increase profit margins.

Obesity has a tremendous impact on the global food and beverage industry. The desire for healthful foods has grown, as has the demand for more detailed nutritional information. Companies have responded by launching lower-calorie foods and tightening control over how their brand is viewed in response to both of these changes. Companies want to be viewed as a healthy brand, thus they support activities that indicate this, such as youth sports. There has even been talk of levying a tax on foods linked to obesity to deter people from eating them.
