announces a Money Back Guarantee.

Company Ethos: For the first time in Web3! Putting their money where their mouth is, SAVE THE DATE - NFT Collection and female founders offer a Money Back Guarantee in the smart contract. No trust needed. If you bought your DATE directly from the project and you want a refund, you can get 0.07 ETH back and this is guaranteed in the smart contract.

SAVE THE DATE is an NFT project that lets you hold your DATE and continue to celebrate it forever. Everyone has at least one day they hold dear. It may be a birthday, an anniversary, a moment, a memory. Each NFT for purchase represents that ONE day (month, day, year) from a specific day over the last 50 years that you will hold the key to by purchasing the right to that NFT/date. The collection consists of a series of 18,250 NFTs where each DATE is a 1/1 unique combination of 8 numbers that together represent one day in the last 50 years, and today announces for the first time in Web 3.0 a money back guarantee in the smart contract.

The mission of "SAVE THE DATE" is to create meaningful human connections through celebration, legacy, and ownership (minting) NFTs of special dates in the metaverse calendar. By being the first to own the metaverse calendar, we allow you to own the most precious resource of all -
