

Canadian Air Transport Security Authority (CATSA) Awards Mobile Biometric Reader Contract to Imagemware

Imagemware chosen by CATSA to provide their mobile Imagemware Identify solution to secure access to restricted areas at 32 Canadian airports.

SAN DIEGO, CA, UNITED STATES,
August 15, 2022 /EINPresswire.com/ --

[Imagemware](#)® (OTCQB: IWSY) (“Imagemware” or “the Company”), a leader in biometric identification and authentication, was chosen by the Canadian Air Transport Security Authority (CATSA), as the successful vendor, to provide their mobile [Imagemware Identify](#) solution to secure access to restricted areas at 32 Canadian airports.

“

This strategic win with CATSA is further validation of our strategy and roadmap, and will even accelerate our development efforts of the growing Imagemware Identity Platform.”

AJ Naddell, SVP Product Management and Sales

CATSA's current fleet of mobile biometric readers have reached their end of life, and they needed a modern solution to replace them. CATSA put together a sophisticated set of requirements to not only replace the aging devices but to modernize the user experience.

- teamed up with IDSecure, a leader in mobile hardware for law enforcement, to provide an all-in-one solution that exceeds CATSA's requirements and provides them with a future-proof solution, to meet both current and emerging needs. The solution uses Imagemware Identify, a module of the newly modernized Imagemware Identity Platform, along

with a mobile device designed by IDSecure, which includes an iris scanner from IrisID and fingerprint readers from Integrated Biometrics, with potential for moving to contactless fingerprint.

“This strategic win with CATSA is further validation of our strategy and roadmap, and will even accelerate our development efforts of the growing Imagemware Identity Platform,” said AJ Naddell, Imagemware’s SVP of Product Management & Sales. “The required enhancements for this project are not just a one-off. We strategically responded to this competitive solicitation as this will

bolster our position with many other customers, satisfying use cases including facility access, prisoner transfer, and more.”

This is a highly strategic deal that represents \$6.2M CAD over five years, with approximately half of the total contract value to be realized in 2022. The CATSA contract comes on the heels of several other deals and in advance of many more as Imageware’s revitalized Identity Platform takes the market by storm.

About Imageware Identify

Imageware Identify can read various smart cards and match the stored biometrics against live capture of iris, face, and fingerprint. The streamlined user interface makes capturing biometrics easy. The solution is designed to support nearly any use case and workflow, dynamically adapting screens for the required inputs.

About Imageware®

Imageware identifies, verifies, and authenticates who people are, not just what keys and codes they have. Our server-based, multimodal biometric solutions provide faster, accurate identification to better secure communities, data, and assets. Imageware solutions are trusted globally by law enforcement, government agencies, and private enterprises. Imageware: Identity with Biometric Certainty.
