

# Packaging Coating Additives Market to Grow Substantially at 5.7% CAGR from 2022 to 2028 | Size, Share, Growth and Players

*Packaging coating additives are a kind of addition to improving the packaging methods employed.*

PUNE, MAHARASHTA, INDIA, August 16, 2022 /EINPresswire.com/ -- The [packaging coating additives market](#) size is expected to grow at a compound annual growth rate of 5.7% for the forecast period of 2021 to 2028. Data Bridge Market Research report on the [packaging coating additives](#) market provides analysis and insights regarding the various factors expected to be prevalent throughout the forecasted period while providing their impacts on the market's growth.

Packaging coating additives are a kind of addition to improving the packaging methods employed. These additives improve the processing and manufacturing performance of packages while enhancing the characteristics of packaging materials. These coating additives also act as a barrier involving the product and the packaging material utilized, stopping both of them from sticking to each other, which helps eliminate the packaging material.

Sample PDF showcases the content structure and the nature of the information included in the report which presents a qualitative and quantitative analysis:

The packaging coating additives market is anticipated to be driven considerably due to the significant growth of the middle-class population's rising disposable income in the emerging economies. Also, the rising health awareness is acting as a key determinant favoring the growth of the market over the forecast period of 2021 to 2028. The major factor accountable for the market's growth is the increasing competition is encouraging manufacturers to innovate and develop new packaging methods that require a decreased amount of resources and improved

protection along with rising disposable income has also increased the demand for packaged items. Besides this, the various advantages offered by packaging coating additives products such as ease of handling, lower cost, and insignificant wastages are also flourishing the growth of the [global packaging coating additives market](#).

However, the strict environmental and government regulations and volatility of raw material prices may act as key restraints toward packaging coating additives market growth rate in the forecast period of 2021 to 2028, whereas managing plastic waste from different industries has the potential to challenge the growth of the target market.

### Competitive Landscape and Packaging Coating Additives Market Share Analysis

The packaging coating additives market competitive landscape provides details by competitors. Details included are company overview, company financials, revenue generated, market potential, investment in research and development, new market initiatives, global presence, production sites and facilities, production capacities, company strengths and weaknesses, product launch, product width and breadth, application dominance. The above data points provided are only related to the companies' focus related to the packaging coating additives market.

The major players covered in the packaging coating additives market report are Croda International Plc, BASF SE, Clariant, Lonza, 3M, Arkema, Evonik Industries AG, Solvay, Akzo Nobel N.V., DAIKIN INDUSTRIES Ltd., Ampacet Corporation, ALTANA, Kao Corporation, Höganäs AB, PCC Chemax Inc., MÜNZING Corporation, PPG Industries, Inc., Flint Group, DIC CORPORATION, and The Sherwin-Williams Company among other domestic and global players. Market share data is available for global, North America, Europe, Asia-Pacific (APAC), Middle East and Africa (MEA), and South America separately. DBMR analysts understand competitive strengths and provide competitive analysis for each competitor separately.

Furthermore, the ever-increasing demand for bio-based slip additives and increasing trend for e-commerce in developed as well as developing countries will further offer a variety of growth opportunities for the packaging coating additives market in the above-mentioned forecast period. Also, the growing demand for packaging coating additives products from industrial packaging and healthcare packaging sectors are also highly impacting the growth of the packaging coating additives market in the forecast. Likewise, the increasing demand for flexible packaging coatings materials is also expected to drive the demand for the packaging coating additives market.

This packaging coating additives market report provides details of new recent developments,

trade regulations, import-export analysis, production analysis, value chain optimization, market share, the impact of domestic and localized market players, analyses opportunities in terms of emerging revenue pockets, changes in market regulations, strategic market growth analysis, market size, category market growths, application niches and dominance, product approvals, product launches, geographical expansions, technological innovations in the market. To gain more info on the packaging coating additives market contact Data Bridge Market Research for an Analyst Brief, our team will help you take an informed market decision to achieve market growth.

## Global Packaging Coating Additives Market Scope and Market Size

The packaging coating additives market is segmented on the basis of function, formulation, and application. The growth amongst the different segments helps you in attaining the knowledge related to the different growth factors expected to be prevalent throughout the market and formulate different strategies to help identify core application areas and the difference in your target markets.

Based on function, the packaging coating additives market is segmented into anti-block, anti-fog, antimicrobial, antistatic, and slip.

On the basis of formulation, the packaging coating additives market is segmented into water-based, solvent-based, and powder-based.

The application segment for the packaging coating additives market is segmented into food packaging, industrial packaging, healthcare packaging, consumer packaging, and others.

## Packaging Coating Additives Market Country Level Analysis

The packaging coating additives market is analyzed and market size and volume information is provided by country, function, formulation, and application as referenced above.

The countries covered in the packaging coating additives market report are the U.S., Canada, and Mexico in North America, Germany, France, the U.K., Netherlands, Switzerland, Belgium, Russia, Italy, Spain, Turkey, Rest of Europe in Europe, China, Japan, India, South Korea, Singapore, Malaysia, Australia, Thailand, Indonesia, Philippines, Rest of Asia-Pacific (APAC) in the Asia-Pacific (APAC), Saudi Arabia, U.A.E, Israel, Egypt, South Africa, Rest of the Middle East and Africa (MEA) as a part of the Middle East and Africa (MEA), Brazil, Argentina and Rest of South America as part of South America.

Asia-Pacific region leads the packaging coating additives market because of the growing demand for packaging applications, easy availability of raw materials, changing lifestyles, and rapid industrialization in the region. Europe is expected to expand at a significant growth rate of strict government regulations on the ban of plastic products for packaging in this region.

## Major Key Points of Packaging Coating Additives Market

About Data Bridge Market Research:

Data Bridge Market Research is a multinational management consulting firm with offices in India and Canada. As an innovative and neoteric market analysis and advisory company with unmatched durability levels and advanced approaches. We are committed to uncovering the best consumer prospects and fostering useful knowledge for your company to succeed in the market.

Data Bridge Market Research is a result of sheer wisdom and practice that was conceived and built-in Pune in the year 2015. The company came into existence from the healthcare department with far fewer employees intending to cover the whole market while providing the best class analysis. Later, the company widened its departments, as well as expanded its reach by opening a new office in the Gurugram location in the year 2018, where a team of highly qualified personnel joins hands for the growth of the company. "Even in the tough times of COVID-19 where the Virus slowed down everything around the world, the dedicated team of Data Bridge Market Research worked round the clock to provide quality and support to our client base, which also tells about the excellence in our sleeve."

We provide a variety of services such as market verified industry reports, technology trend analysis, Formative market research, strategic consulting, vendor analysis, production and demand analysis, and consumer impact studies among many others.
