Market Overview (2016-2026)

- Historical Market Size (2020): USD 285 million
- Forecast CAGR (2021-2026): 31.5%
- Forecast Market Size (2026): USD 1555 million

Hundreds of species of crayfish are found in North America and in the United States, the southern state Louisiana is a major producer of these crayfish. The Cajun style of crayfish has a

historical significance and is very well acclaimed and eaten with utter delight in Louisiana due to which it demands a massive stock of the same. Crayfish make a nutritious meal containing iron, calcium, and magnesium and as healthy eating progresses to become a lifestyle, it is gaining consumer preference. Some other uses of crayfish like as a bait, pet or for research and study also leads to higher demand for it.

Industry Definition and Major Segments

Crayfish is a type of crustacean found in freshwater. It is like lobsters but smaller in size. Crayfish is called by distinct names like, freshwater or mountain lobsters or mudbugs because they live in the mud of freshwater sources. They may be of different colors varying from red, green to golden.
