Market Summary:-

Probiotics are the good microorganisms (bacteria, yeast and fungi) that provide a wide range of health benefits to the consumers. Probiotics improve the functioning of vital bodily systems and strengthens the immunity system against numerous diseases. Probiotics improve the gut health, support the digestive system and accelerate the biological processes. As a result, probiotics are being largely used as important ingredients in the animal feed products.

Rising personal disposable income and growing consciousness towards maintaining good animal health are the major factors fostering the growth of the market. Changing lifestyle, westernization, rising research and development initiatives taken by major companies especially in the developing economies, surging implementation of innovative animal husbandry practices, ban on the application or use of animal antibiotics and ever-rising global livestock population are acting as market growth determinants. Improving distribution channel, rising demand for animal based products in the developing economies, growing shift towards natural animal health growth promoters and awareness among consumers about the benefits associated with the consumption of meat and dairy products will further induce growth in the market value.

However, stringent regulations for probiotics in animal feed products to meet the international quality standards will pose a major challenge to the growth of the market. Fluctuations in the prices of raw materials and supply chain disruptions owing to the pandemic will further restrict the scope of growth for the market. High cost associated with the research and development activities will also hamper the market growth rate.

Some of the major players operating in the Probiotics in Animal Feed market are: Chr. Hansen Holding A/S, DSM, DuPont., Evonik Industries AG, Land O'Lakes, Inc., Kerry., Novus International, Inc., Novozymes, Lesaffre, Lallemand Inc, Alltech, Adisseo, ASAHI GROUP HOLDINGS, LTD., Unique Biotech, Pure Cultures, Vit-E-Men Company, Suguna Foods Private Limited., Provita Eurotech and Protexin

About Data Bridge Market Research, Private Ltd

Data Bridge Market Research Pvt Ltd is a multinational management consulting firm with offices in India and Canada. As an innovative and neoteric market analysis and advisory company with unmatched durability level and advanced approaches. We are committed to uncover the best consumer prospects and to foster useful knowledge for your company to succeed in the market.

Data Bridge Market Research is a result of sheer wisdom and practice that was conceived and built-in Pune in the year 2015. The company came into existence from the healthcare department with far fewer employees intending to cover the whole market while providing the best class analysis. Later, the company widened its departments, as well as expands their reach by opening a new office in Gurugram location in the year 2018, where a team of highly qualified personnel joins hands for the growth of the company. "Even in the tough times of COVID-19 where the Virus slowed down everything around the world, the dedicated Team of Data Bridge Market Research worked round the clock to provide quality and support to our client base, which also tells about the excellence in our sleeve."
