The report provides a detailed analysis of the market, including a list of key players and their market share.

Vaccination camps and programs organized by various health care organizations have been affected due to the coronavirus pandemic. Having said that, flu vaccination rates have peaked during pandemics due to efforts by various healthcare organizations and governments to vaccinate citizens for free. Fears of flu and COVID-19 have also increased public awareness.

Developing a new vaccine is a long process that usually takes 10-15 years to develop and establish safety and efficacy. Regulatory requirements for clinical trials vary from country to country, which may delay vaccine development thereby limiting market growth.

North America was the highest revenue generating country in the global influenza vaccine market with a share of 47.80% in 2020. On the other hand, the Middle East and Africa is

expected to grow at a CAGR of 8.0%, owing to the increase in incidence of influenza. Increase in children and disposable income.

Key Market Segments

By Vaccine Type

- Quadrivalent
- Trivalent

By Type:

- Seasonal
- Pandemic

By Technology:

- Egg-based
- Cell-based

By Route Of Administration:

- Injection
- Nasal Spray

Key Market Insights

- By vaccine type, quadrivalent segment accounted for nearly 63% share of the Influenza Vaccine market in 2020.
- By technology, the egg-based segment expected to grow at a CAGR of 7.70% from 2021 to 2030.
- By age group, the adult segment held largest market share in of 61% in 2020 and is expected to remain dominant throughout the forecast period.
- By route of administration, the injection segment expected to grow at a CAGR of 7.40% from 2021 to 2030.
- By region, North America is expected to provide lucrative market growth opportunities and grow at a CAGR of 6.9% from 2021 to 2030.
