

LPS Industries Deploys State-of-the-Art Pouch-Making Machine

Mamata Vega 610-Plus Enhances LPS Flexible Packaging Capability

MOONACHIE, NEW JERSEY, UNITED STATES, August 18, 2022

/EINPresswire.com/ -- LPS Industries, Moonachie NJ, (www.lpsind.com), a vertically integrated flexible packaging manufacturer, has deployed the Mamata Vega 610-Plus pouch-making machine at its factory. This new pouch machine adds another state-of-the-art capability to produce pouches for the food, pet food and industrial markets.

Paul Harencak, Vice-President of LPS Industries, stated, "LPS Industries has been a leader in flexible packaging for more than 60 years. The deployment of the 2-lane Mamata Vega 610-Plus will help us maintain our leadership position for years to come.

LPS Industries, an innovative leader in flexible packaging for over 60 years is proud to announce the arrival of the Mamata Vega 610-Plus. This new pouch machine adds another state-of-the-art capability to produce pouches for various industries. ,

He added, "With the addition of the new multi-layer pouching machine we have more options to fulfill your needs, whether you are looking for a flat bottom pouch, a three-sided gusseted bag, or a stand-up gusseted pouch."

Mamata's Vegaplush Pouch Systems are available in working widths of 410 mm (16"), 610 mm (24"), 820 mm (32") and 1020 mm (40").

Harencak stated, "The Vegaplush pouch systems are perhaps the most versatile in the world. LPS Industries selected the Vega 610-Plus version because it handles sizes that are most popular with our clientele."

Mamata pouch-making systems offer users the flexibility to make pouches from un-supported co-ex films, pouches with separate top and bottom printed film with registration control, and pouches with full bleed print without print plate brake.

Its modular design allows freedom to adapt to differing conversion needs and process laminated and co-extruded films with equal ease. The servo technology used to achieve and enhance processing advantages, especially in two areas of tension control and real seal time controls makes it unique.

Converting capabilities include: 3 side seal pouches, zipper pouches, stand-up pouches with single film as well as separate insert bottom gusseted with print registration control, retort pouches with notch-less rounded corners, side gusseted zipper pouches, flat bottom pouches and more

Harencak concluded, "LPS Industries is dedicated to utilizing the best, most advanced technology as we pursue our objectives of making better packaging products that deliver for our clients, their consumers, and the environment. The Vega 610-Plus allows us to expand our product offerings."
