As per The Business Research
Company's "Multifamily Housing Green
Buildings Global Market Report 2022",
the [multifamily housing green](#)

[buildings market size](#) is expected to grow from \$97.17 billion in 2021 to \$116.63 billion in 2022 at a compound annual growth rate (CAGR) of 20%. The growth in the multi-family residential green buildings market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The multi-family residential green buildings market is expected to reach \$241.18 billion in 2026 at a CAGR of 19.9%. Customer awareness on factors such as environmental impacts, sustainability, and long-term cost savings is driving the growth of the multi-family residential green building market.

[Multifamily Housing Green Buildings Industry Trends](#)

Consumers and builders are targeting achieving more sustainable homes with a focus on minimizing carbon footprint by promoting self-sustainable homes, termed as Net-zero homes. A Net Zero home produces energy through various domestic renewable energy technologies such as solar panels, micro wind turbines, sinkholes, compost gas for its requirements. It aims to produce at least as much energy as it consumes. Net zero home stock is projected to rise from 57,800 homes in 2019 to 534,500 homes in 2028. Around 36% of multi-family home builders are building their homes green, 80% of them are dedicated green home builders with more than 90% of their projects green. The green builders are expected to grow to 47% by 2022 and are
