

Land Planning And Development Global Market Estimated To Grow At 12% Rate

The Business Research Company's Land Planning And Development Global Market Report 2022: Market Size, Trends, And Forecast To 2026

LONDON, GREATER LONDON, UK,
August 18, 2022 /EINPresswire.com/ --
As per The Business Research Company's "Land Planning And Development Global Market Report 2022", the [land planning and development market share](#)

is expected to grow from \$148.85 billion in 2021 to \$167.34 billion in 2022 at a compound annual growth rate (CAGR) of 12.4%. The growth in the land planning and development market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The land planning and development market is expected to reach \$259.67 billion in 2026 at a CAGR of 11.6%. A rapidly growing urban population is expected to increase the demand for new residential buildings during the forecast period.

Land Planning And Development Market Trends

According to the land planning and development market analysis, land planning and development companies are using advanced technologies such as drones to efficiently manage land development projects. A drone is an unmanned aerial vehicle (UAV) that is integrated with communication technologies and controlled by a remote. Some of the typical applications of drones in land development include capturing panoramic images for marketing or communications, earthwork volume calculations, elevation mapping and environmental analysis. During land development, the terrain can change daily, thus requiring project managers to monitor these changes and accurately gauge the progress. Drones can help in collecting the data and keep project managers informed of the project's progress and help them to make better
