Market Summary:-

Industrial packaging refers to the type of packaging that is specially designed for delivering goods to the customers. The main aim of these packaging is protecting goods from being damaged. Some of the common type of the industrial packaging is crates, protective films, Drums, pails and corrugated boxes. This type of packaging is utilized in industries such as food and beverages, building and construction and chemical among others.

The rise in the modern retailing across the globe acts as one of the major factors driving the growth of industrial packaging market. The increase in adoption of this packaging to store and transport bulk liquid and granulated substances such as solvents, chemicals, industrial equipment, food ingredients, and pharmaceuticals and rise in volume of resources and products that are being transported across various regions accelerate the market growth. The increase in demand for industrial packaging from construction and chemical industries, globalization and international trade along with high optimization in pack size further influence the market. Additionally, rise in demand for plastic sacks, increase in retail outlets, increase in demand from healthcare and pharmaceutical sectors, rapid industrialization and high demand of consumer goods positively affect the industrial packaging market. Furthermore, product innovation for industrial packaging extends profitable opportunities to the market players in the forecast period of 2021 to 2028.
