The global antimalarial drugs market was valued at \$711,360 thousand in 2018, and is expected to reach \$1,019,396 thousand by 2026, registering a CAGR of 4.6% from 2019 to 2026.

Malaria is a deadly infectious disease, which is transmitted through the bite of female Anopheles mosquito. The infection spreads to liver cells where the parasites multiply at a fast rate to invade red blood cells. These parasites further grow and mature in red blood cells to form merozoites, which are released upon the rupture of red blood cells to invade other blood cells. This leads to fever, tiredness, vomiting, headaches, impaired consciousness, multiple convulsions, and abnormal bleeding. Hence, the drugs which are employed in the treatment of malarial infection are called as antimalarial drugs. There are different types of antimalarial drugs such as quinine, chloroquine, proguanil, mefloquine, pyrimethamine, and others available in the market.

The major factor that drives the growth of the antimalarial drugs market include rise in prevalence of malaria in developing countries. Furthermore, rise in awareness initiatives by governments and surge in research for new antimalarial drugs are some of the factors that boost the growth of the market. However, lack of awareness about healthcare in developing countries is a major factor that restricts the growth of the antimalarial drugs market in the region.

Which market perspectives are enlightened in the Antimalarial Drugs market report?

Executive Summary: It covers a summary of the most vital studies, the Worldwide Antimalarial Drugs market increasing rate, modest circumstances, market trends, drivers and problems as well as macroscopic pointers.

Study Analysis: This covers major players, vital market segments, the scope of the products offered in the Antimalarial Drugs market, the years measured and the study points.

Competitive Analysis: In this segment each player is screened based on a products, services, value, SWOT analysis, growth and other significant features.

Geographic Analysis: This Antimalarial Drugs market report analyses data on the basis of production, sales, imports & exports, and key players in all regional markets.

Antimalarial Drugs Market Segments and Sub-segments::

Antimalarial Drugs Market by Key Players: Alvizia Healthcare Pvt. Ltd., Bayer AG, F. Hoffmann-La Roche Ltd, GlaxoSmithKline Plc, Ipca Laboratories Ltd., Merck & Co., Inc, Novartis AG, Pfizer Inc., Sun Pharmaceutical Industries Ltd. (Ranbaxy Laboratories), and Zydus Cadila.

Antimalarial Drugs Market By Drug Class: Quinine, Chloroquine, Proguanil, Mefloquine, Pyrimethamine, and Others

Antimalarial Drugs Market By Distribution Channel: Hospital Pharmacy, Retail Pharmacy, and E-Commerce & Other Distribution Channel
