Variety of dental prosthetics such as crowns, crown lays, veneers, inlays & onlays, fixed bridges, dental implant restorations, dentures, orthodontics, and full-mouth reconstruction can be manufactures with the help of CAD/CAM. The use of CAD/CAM in dentistry ensures sufficient strength of restorations, maintains natural appearance, and increases the accuracy and speed of creating tooth restorations.

The Brazilian market is driven by accelerated incidence of tooth loss, growth in edentulous and geriatric population, benefits of dental CAD/CAM-based restorations in comparison to dental lab restorations, and rise in technological advancements in dental CAD/CAM systems. However, high cost of CAD/CAM systems, high maintenance costs, and limited reimbursements impede this market growth.
