a new direction. Rather than defense, growth would be a new aim, such as helping the economy grow by assisting organizations to increase their client or customer outreach. A start-up was started as part of this goal, and today, the company has staff with over 50 years of combined industry experience in the marketing sector.

Sprint Data Solutions Worldwide Marketing got into the business when the industry was on the verge of a shift. Traditional marketing platforms like print and radio advertising maintained their dominance, but digital was already emerging, and people had taken notice. The company's opening focus was on direct mail marketing, a choice that fortuitously imparted skills in data acquisition, management, and analytics. As digital marketing became a viable platform faster than many had anticipated, the company was positioned to pivot toward it. It integrated digital marketing into its services and provided an early mover advantage that yielded significant gains for the company and its clients.

Sprint Data Solutions Worldwide Marketing has expanded beyond its starting service range of only the hometown of Las Vegas, Nevada. The remainder of the United States is now covered, including Alaska and Hawaii. The North American continent is also served, with market access to Canada and Mexico. For businesses that want to go international, it's possible to cross the Atlantic and use databases to access European Union markets like France.

enthusiasts either follow golf games and tournaments or participate in the sport themselves, and this is a passion cut across sexes, races, and ages.

However, golf is not just an American sport, and there is an interest in the activity beyond the shores of the United States. It's natural that golf, not having originated in the USA, has enthusiasts worldwide, and even Saudi Arabia has, of late, shown a passion for golf that Americans appreciate.

A Growing Market

Saudi Arabia has taken its considerable resources and quickly entered the world stage in many areas. Golf is just the latest, with the LIV tournament being a new, young competition that has already attracted some of the biggest names in the golf world thanks to the lucrative purse offered at these tournaments. Even the former President is getting in on the act, hosting games at his golf courses.

As a result, many enthusiastic Americans about golf are now interested in the developments of Saudi golf tournaments. This has created a new market that easily transitions from the current golfing demographics and opens up new possibilities for travel and many other industries. However, this new demographic can only be utilized if businesses know how to reach them.
