

# Water And Waste Management Consulting Services Global Market Estimated To Grow At 14% Rate

*The Business Research Company's Water And Waste Management Consulting Services Global Market Report 2022: Market Size, Trends, And Forecast To 2026*

LONDON, GREATER LONDON, UK,  
August 19, 2022 /EINPresswire.com/ --  
As per The Business Research Company's "Water And Waste Management Consulting Services Global Market Report 2022", the water

and waste management consulting services market is expected to grow from \$28.05 billion in 2021 to \$31.94 billion in 2022 at a compound annual growth rate (CAGR) of 13.9%. The growth in the water and waste management consulting services market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The water and waste management consulting services market is expected to reach \$50.21 billion in 2026 at a CAGR of 12.0%. The increasing industrial and municipal waste due to rapid urbanization is contributing to the growth of the water and waste management consulting services market.

Water And [Waste Management Consulting Services Industry](#) Trends

SaaS (software-as-a-service)-based consulting is the recent trend gaining popularity in water and waste management consulting. The use of the SaaS platform is increasing in companies to deliver online services such as water quality management, EHS compliance, and carbon reporting. SaaS delivery model operates when a software vendor provides access to its software and works remotely as a web-based service. Many companies are offering SaaS to water and waste management companies to improve the operations performed by the company. For instance, from 2020, Trimble started to offer a new SaaS program for remote monitoring of

Forecast To 2026

water and wastewater infrastructure. With the new SaaS program, water and wastewater utilities can access the hardware and software technologies through subscription to be utilized for remote monitoring of critical infrastructure.

### Overview Of The Water And Waste Management Consulting Services Market

The water and waste management consulting services market consists of the sales of water and waste management consulting services by entities (organizations, sole traders and partnerships) that provide advice and assistance to business entities and other organizations on activities such as wastewater treatment and solid waste management. They offer expertise on processes to treat industrial waste such as solid, liquid, gaseous or radioactive substances from a wide range of industries and organizations. Only goods and services traded between entities or sold to end consumers are included.
