According to the latest research by InsightAce Analytic, the global [Asthma Spacers](#) market is valued at US\$ 1.51 Billion in 2021, and it is expected to reach US\$ 2.47 Billion by 2030, with a CAGR of 5.9% during a forecast period of 2022-2030.

Since asthma is a chronic ailment, there is no long-term treatment available. To manage the ailment and lead a normal life, people are employing a variety of therapies and dietary changes. Asthma symptoms are being treated

with inhalers more frequently. Most people are unable to use inhalers efficiently because they need to take a good, deep breath just as the medication is about to be released. The use of

spacers helps patients take their medications more effectively. With a spacer, patients can use the inhaler for longer, which simplifies the procedure. When inhaling the drug and pushing the inhales, it requires less coordination. A spacer is a holding chamber-equipped hollow tube that is commonly constructed of plastic. It facilitates the use of a puffer, also known as an MDI, to administer asthma or chronic obstructive pulmonary disease (COPD) medication (metered-dose inhaler).

The market for asthma spacers is anticipated to expand significantly as respiratory issues become more common. Investments made by the government and healthcare organisations to promote public knowledge of this product and avoid respiratory disorders. Additionally, it is projected that over the course of the projection period, technical breakthroughs in the realm of inhalers and spacers will accelerate market expansion. Additionally, it is anticipated that the market for asthma spacers would soon increase due to the rising number of generic medications receiving approvals with increased efficacy. However, the cost of the asthma spacer products is anticipated to impede market expansion throughout the anticipated period. Another factor that is expected to hinder market growth during the forecast period is the general lack of awareness of this product.

North America is anticipated to be the major contributor to the Asthma Spacers market over the forecast years. One of the factors causing the market to grow is the region's increased asthma prevalence and increasing knowledge of the use of asthma spacers. In addition, the Asia Pacific Asthma Spacers market is expected to grow significantly during the forecast period due to the region's increased frequency of asthma and the use of asthma spacers. The product demand is also anticipated to increase as a result of product developments. The main driver of rising sales and demand for spacers in the Asia Pacific region is consumer awareness of the products that are on the market.

Major market players operating in the Asthma Spacers market include Medical Development International, Pari GmbH, Conmed Corporation, Trudell Medical International, GlaxoSmithKline, Merck & Co., Inc, AstraZeneca, Cipla, Clement Clarke, Lupin, Fisons, Koninklijke Philips N.V, Bird Healthcare, InspiRX Inc. and many more.

Recent collaborations and agreements in the market:

- In September 2019, GlaxoSmithKline (GSK), a pharmaceutical business with headquarters in the UK, and Avalon Ventures have finalized their deal for GSK to acquire Sitari Pharmaceuticals.

The agreement covers the Company's acquisition and its intellectual property. To effectively stop the inflammatory response that causes intestinal inflammation and cell pathogenesis, Sitari is creating TG2 inhibitors. GSK intends to conduct its research on immunologic-driven diseases as well as biologically relevant targets with the addition of the TG2 program.

- In March 2019, Envy Medical, Inc. was purchased by Allergan plc. Envy Medical's commitment to skincare goods and to offering Allergan customers a variety of services is strengthened by the inclusion of Dermal infusion. Teenagers are drawn to the skin resurfacing process, which emphasises skin consistency.

Market Segments

Global Asthma Spacers Market, by Brand, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Space Chamber Plus
- A2A Spacer
- Flo-Tone CR
- Able Spacer
- AeroChamber
- Volumatic
- Vortex
- OptiChamber
- Others

Global Asthma Spacers Market, by Application, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Hospital Pharmacies
- Online Pharmacies
- Retail Pharmacies

Global Asthma Spacers Market, by Region, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East & Africa

North America Asthma Spacers Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- U.S.
- Canada

Europe Asthma Spacers Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of

Units)

- Germany
- France
- Italy
- Spain
- Russia
- Rest of Europe

Asia Pacific Asthma Spacers Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- India
- China
- Japan
- South Korea
- Australia & New Zealand

Latin America Asthma Spacers Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- Brazil
- Mexico
- Rest of Latin America

Middle East & Africa Asthma Spacers Market, by Country, 2022-2030 Value (US\$ Mn) and Volume (No. of Units)

- GCC Countries
- South Africa
- Rest of Middle East & Africa

Why should buy this report:

- To receive a comprehensive analysis of the prospects for the global Asthma Spacers market
- To receive an industry overview and future trends of the Asthma Spacers market
- To analyze the Asthma Spacers market drivers and challenges
- To get information on the Asthma Spacers market value (US\$Mn) and Volume (No. of Units) forecast to 2030
- To get information on significant investments, mergers & acquisitions in the Asthma Spacers market industry
