

Florida Primary Elections: World's Tallest Digital VOTE Button & Electronic U.S. Flag Ignite Paramount Miami Worldcenter

MIAMI, FLA, USA, August 22, 2022

/EINPresswire.com/ -- During Florida's

Primary Election week, the World's Tallest Electronic American Flag and the World's Tallest Digital Vote Button are lighting-up the South Florida skyline at the 60-story Paramount Miami Worldcenter skyscraper in downtown Miami.

Paramount Miami Worldcenter's patriotic message encourages Floridians to exercise their right to vote – a right many people around the world do not have and a right some Americans take for granted."

Daniel Kodsí, CEO, Royal Palm Companies

"Paramount Miami Worldcenter's 700-foot-tall patriotic public service message encourages Floridians to exercise their constitutional right to vote – a right many people around the world do not have and a right some Americans take for granted," says Daniel Kodsí (Cod-See), CEO of the Royal Palm Companies real estate firm; developer of the Paramount Miami Worldcenter Tower.

It is the ultra-futuristic soaring signature skyscraper of the \$4-billion, 27-acre Miami Worldcenter, which is America's

second-largest urban real estate development.

World's Most-Advanced Animation Lighting System

Through Paramount's 700-foot-tall center column is a vertical stream of red and white L.E.D. stripes combined with the words, "VOTE FLA."

Across Paramount Miami Worldcenter's rooftop crown is a 100-foot-tall by 300-foot-wide fluttering field of blue and five-pointed white stars.

The display then transitions into a 100-yards-in-diameter circular "VOTE" lapel button image.

The Paramount Miami Worldcenter superstructure, which is as tall as two-and-a-half football fields, features the world's most-technologically-advanced Color Kinetics Animated Lighting

System.

It consists of 16,000 light emitting diodes (L.E.D.'s) embedded in 10,000 panes of high impact-resistant glass.

The \$3-million lighting system, which took 12 technicians a total of three years to build, can create a combination of 16.2-million colors.

The lighting system was designed and installed by L.E.D. Smith, Inc. of West Palm Beach, Florida.

CEO Gavin Cooper has designed lighting systems for scores of buildings, bridges and monuments, including The Empire State Building.
