

Interactive Patient Engagement Solutions Market: Trends, Business Strategies And Opportunities With Key Players Analysis

Report presents information related to key drivers, restraints, and opportunities along with detailed analysis of the market share.

PORTLAND, OREGON, US, August 22, 2022 /EINPresswire.com/ -- The development of Eoxys Smart Solutions brings advanced nurse call features, which enable nurses to call from the patient room, patient toilet where patient calls can be sent directly to the relevant staff members enabling instant communication. These products increase patient safety, increase patient satisfaction and increase employee efficiency. Factors

such as the growth of an aging population and the increase in the burden of chronic diseases such as diabetes, obesity and hypertension are driving the adoption of patient engagement measures worldwide. Healthcare apps that can be easily downloaded on smartphones are increasing day by day. By collaborating and <u>involving patients</u> in the decision-making process, health care providers can make better decisions about patient health, improve patient-provider relationships, and overall patient retention.

Increased knowledge and understanding encourages patients to actively engage in their own health, well-being and health care choices, leading to improved care. Increasing collaboration and partnership between stakeholders and government regulations and initiatives to promote healthcare IT services drive market growth. This year, Salesforce launched Vaccine Cloud, a global vaccine management CRM platform to help governments, healthcare groups, and launch vaccine programs. The main concerns associated with these solutions are data security and privacy.
