

# Skillsz's Upgraded Version Makes Screening Faster, Data-Driven & Accurate

*Skillsz's all-new exclusive features enable you to avoid assumptions in screening & make informed and data-driven hiring decisions.*

KOLKATA, WEST BENGAL, INDIA, August 24, 2022 /EINPresswire.com/ -- [Capital Numbers](#), an ISO 9001 and ISO 27001 certified digital transformation company, announced today a major upgrade to their existing product: Skillsz, a Software as a Service (SaaS) technical skill assessment platform designed to screen developers and make tech hiring easier & efficient.

Skillsz now has the ability to create a test by itself based on the preferences defined by the recruiters, like - skills to be tested for, the difficulty level of

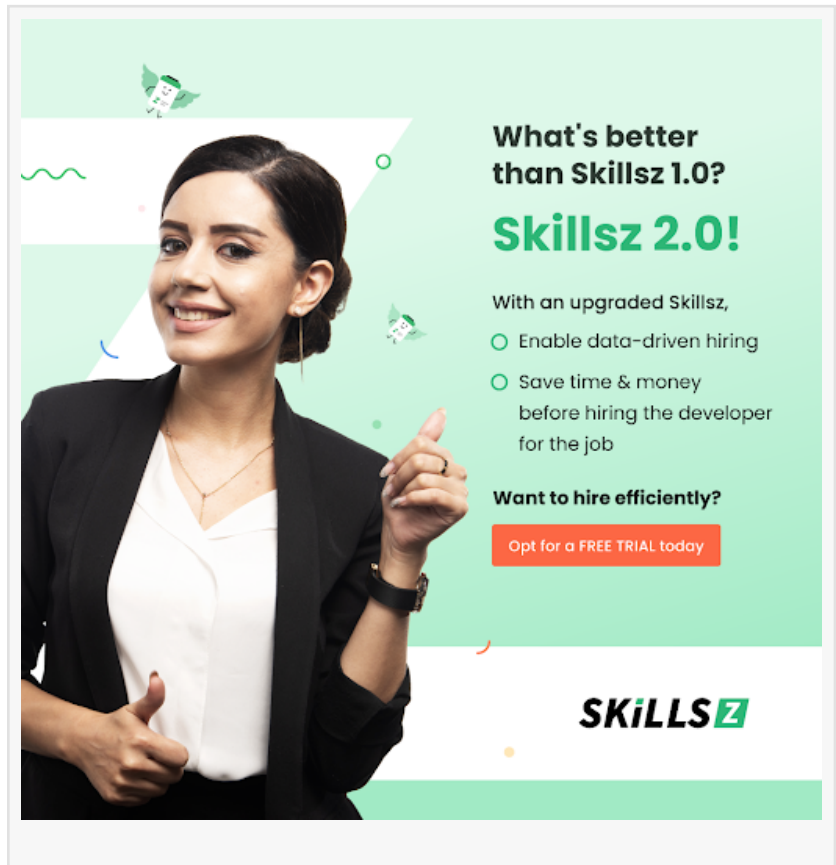

questions for each skill, etc. Where it becomes an enabler for the recruitment team is that they no longer need to wait for tech leads and tech managers to review and approve the question sets before sharing the invitation to candidates. This feature alone is expected to bring down the hiring time by 25%. What's more, Skillsz will now allow more flexibility and control over the test

structure if that is what the team wants to. It will allow recruitment teams to not only add skills and define the difficulty level for each skill, it will now also allow them to define the number of questions for each difficulty level that the team wants the candidate to attempt. Coupled with industry-relevant [features](#) like - cheating prevention, comparative reports & multiple formats of inviting candidates, Skillsz 2.0 is an indispensable tool in the arsenal of new-age recruiters.

“

Skillsz facilitates online hiring and cuts down effectively on the expense and time required to recruit the perfect candidate for the job.”

*Mukul Gupta*

The graphic features a woman in a black blazer and white top pointing towards the text. The background is light green with decorative elements like a leaf and a gear. The text reads: 'What's better than Skillsz 1.0? Skillsz 2.0! With an upgraded Skillsz, Enable data-driven hiring, Save time & money before hiring the developer for the job. Want to hire efficiently? Opt for a FREE TRIAL today. SKILLSZ'.

According to Mr. Mukul Gupta, the founder & CEO of Capital Numbers, "Skillsz facilitates online hiring and cuts down effectively on the expense and time required to recruit the perfect candidate for the job. The HR team can set a benchmark for the candidate performance, thus eliminating conscious or unconscious recruitment biases, enabling fair and judicious recruitment."

Skillsz removes the hassle and cost of wrong hiring and saves time & money by helping test the skills of potential developers quickly and affordably with [technical skills screening software](#) before they are hired for the job.

Skillsz has been built to:

- Create easy tests for evaluating the tech skills of your potential hires
- Assess proficiency levels by creating customized tests as per needs
- Make confident hires powered by insight-led performance dashboards

Want to be sure if Skillsz 2.0 is the right fit for your recruitment team?
