

papmall® provides a C2C eCommerce platform to support international entrepreneurs

With the rise of C2C business, papmall® eCommerce marketplace platform was launched to connect and enable the online communities between buyers and sellers.

LONDON, ENGLAND, UNITED KINGDOM, August 23, 2022 /EINPresswire.com/ -- [papmall®](#) provides a C2C [eCommerce platform](#) to support international entrepreneurs

The development of [marketplace](#) platforms has led to a rise in C2C business. Despite the success of C2C e-commerce, managing cash flow and maintaining security are still issues with C2C payments for both buyers and sellers. An eCommerce marketplace platform has been launched by papmall® to enable online communities of buyers and sellers to connect and exchange values.

papmall® - a C2C eCommerce platform for SMEs, Startups, and freelancers

“

Technology and innovation must be the locomotives for any business. Without them, we'll be digging our own graves.”

CEO Jimmy Lee

papmall®: a C2C eCommerce platform for SMEs, Startups, and freelancers

The C2C business is a type of enterprise that enables private transactions between individuals. Its goal is to help customers and sellers find one another in order to create these interactions.

Customers' C2C transactions are required for C2C business models to complete transactions. However, due to online financial risks and cash flow management, C2C transactions in an online setting are difficult for many small enterprises. To address the problem with C2C auto-payments methods, papmall® would like to suggest some of the C2C payment solutions.

papmall® is a marketplace platform for SMEs and startups expanding their businesses into international markets. Using the papmall® C2C platform, businesses can efficiently collect, protect, and pay back online customers.

papmall® impressed by its advanced C2C payment technology

The platform's advanced technology, particularly in online payments and product verification, can aid the worldwide business community in safety and compliance. On its platform, papmall® helps retailers create their own stores that reflect the logo, brand identity, as well the products and services portfolio from the retailer's website.

Thanks to several anti-fraud and anti-money laundering (AML) protection features, the papmall® platform keeps C2C customer payments and transactions secure. Its system complies with all PCI DSS compliance, 3D Secure, and tokenization standards. As a result, papmall® sellers won't be required to have any additional compliance systems to receive payments from their customers.

In order for sellers and buyers to communicate with one another and exchange values, papmall® has developed a C2C ecosystem. The invoice system provides precise information while also protecting and verifying all the C2C transaction data that can reach more areas.

papmall® is a leader in the space since it supports all C2C payment methods, including credit/debit cards, eWallets, cryptocurrency, and SEPA internet banking transfers. papmall® also offers payment assurances and privacy rules to safeguard C2C buyers and C2C sellers.

papmall®, the brand-new eCommerce marketplace platform, is confident that its customers can rely on it to provide the most convenient payment options to their customers. papmall® offers a platform to anyone in need as part of their own product and service offerings, in addition to providing the C2C platform to help all transaction experiences more seamless.
