

MainMining Release Latest, Profitable ASIC Miners for Long Term Passive Income

AUSTIN, TEXAS, USA, August 24, 2022 /EINPresswire.com/ -- The rapidly evolving global market for cryptocurrency is currently abuzz with the recent introductions of powerful miners such as the latest [Antminer E9](#).

The Antminer E9 is a revolutionary miner in the crypto industry because of its combination of a low power consumption and a high hashing power.

It is a miner created to allow the casual enthusiasts as well as small-time miners to make their longed for passive income out of crypto mining by generating a return of investment.

The Antminer E9, amongst other products can be purchased at [MainMining \(www.MAINMINING.com\)](#).

Over the years, cryptocurrency mining has seen serious improvements. However, owing to the highly technical nature of this domain, it had limited to no scope for people that are technologically challenged. MainMining has already changed that perception by selling machines that are pre-configured and just needs to be plugged-in for an uncomplicated crypto mining experience.

The miners from MainMining are suitable for use at home because they generate low amounts of heat as well as noise. Moreover, unlike hundreds of products in the market, the miners do not need a huge space.

About MainMining:

MainMining was formed by the two taiwanese data engineers Chih-Wei Liao and Wen-Hsiung

Jiang in August 2017. Since then, MainMining has gone from being a national retailer for cryptocurrency mining hardware, to proudly being able to perform worldwide deliveries in early 2022.

Exceptional partnerships have been formed over the years with various ASIC producers such as Bitmain and Goldshell. Therefore, with continuous friendships and close ties with our producers, MainMining has effectively become a top retailer of various cryptocurrency mining hardware to affordable prices.
