made goods. Motorcycle sidecars have drawn attention in recent years for use on some hybrid bikes. Due to their retro style, motorcycle sidecars have gained interest from bike enthusiasts and bike lovers. These bike enthusiasts and bike lovers who concentrate on antique collections will drive the prominent income for the demand for motorcycle sidecars.

Industry Definition and Major Segments

A sidecar for a motorcycle is a single-wheeled vehicle mounted to the side of a motorcycle, moped/scooter, or electric or standard bicycle. It is turned into a three-wheeled vehicle by the addition of a motorcycle sidecar to a two-wheeler. Also known as a mix, rig or hack, a two-wheeler with an attached motorcycle.

Market Trends

Because of their benefit on roads filled with ice and gravel, motorcycle sidecars have also received demand from off-road bikers in recent years. On the other hand, the high cost of sidecars for motorcycles is expected to slow demand growth in price-sensitive regions. In nations such as India, China, ASEAN, Pakistan, etc., motorcycle fleets are wide in number.

Countries like China and Japan also have substantial electric motorcycle production. Asia Pacific is anticipated to be a prominent market for motorcycle sidecars for these reasons. The size of this type of vehicle fleet is small in the mature economies of North America and Europe, and demand for motorcycle sidecars will be driven primarily by bike enthusiasts focusing on vintage motorcycles, which is why moderate markets with less growth are anticipated in these regions.

Key Market Players

The major players in the market Ural Motorcycles, DMC Sidecars & Motorcycle Accessories, Champion Trikes & Sidecars, Watsonian Squire Ltd, and Motorvation Engineering and others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
