

Intetics Speaks at the WorldS4 2022: Live PSE Paper Presentation

Intetics presents the publication, "How Predictive Software Engineering Creates Effective Business Solutions Through Custom Software Development."

NAPLES, FLORIDA, USA, August 23, 2022 /EINPresswire.com/ -- The sixth international WorldS4 conference on Smart Trends in Systems, Security, and Sustainability will be held on 24-27th August in London, UK. The WorldS4 Conference, organized by the GR

Foundation, is a focal point for leading global experts to share their insights. They will guide attendees through more sustainable ways of doing business and delivering value via Information & Communication Technologies across many industries.

Many high-quality submissions are already attracted to stimulate innovative research discussions among academic pioneering researchers and business practitioners by providing them a chance to present their academic papers.

On Friday, August 26 • 4:31 pm – 4:45 pm (BST) Intetics team will make the live presentation: Irina Dubovik, Digital Marketing Director, will present the scientific publication, "How [Predictive Software Engineering](#) Creates Effective Business Solutions Through Custom Software Development." Authors: Boris Kontsevoi, CEO and President, Sergey Kizyan, Delivery Director, Sandbox. Alexey Velesnitsky, CTO, will lead the Q&A session and answer any questions regarding how to apply PSE to bring value to the business.

The paper explores the Predictive Software Engineering (PSE) framework. It covers the seven principles that cumulatively ensure projects' transparency, controllability, and predictability. Readers can find a ready-made strategy to transform their custom software products into successful, [high-quality business solutions](#).

Throughout the article, the authors investigate how PSE principles allow bespoke software development companies to offer transparent products and services that fit budget constraints.

The slide features the Intetics logo with the tagline "Where software concepts come alive" and the WorldS4 2022 logo. The main title is "Intetics Speaks at the WorldS4 2022 Conference: How PSE Creates Effective Business Solutions Through Custom Software Development". Below this, it says "Live Presentation of Paper". Two speakers are listed: Irina Dubovik, Digital Marketing Director, and Alexey Velesnitsky, CTO. On the right is a book cover for "PREDICTIVE SOFTWARE ENGINEERING PSE" with a large orange star graphic. The bottom of the slide reads "Intetics at WorldS4 2022 PSE Paper Presentation".

Each principle is examined individually and backed by strategies, best practices, methodologies, and relevant KPIs. The PSE principles were formulated leveraging 27+ years of software development experience and global engineering best practices.

All WorldS4 2022, papers will be published in conference proceedings by Springer in its Lecture Notes in Networks and Systems. The publications will be indexed by SCOPUS, INSPEC, WTI Frankfurt eG, zbMATH, and SCImago.

The event intends to examine innovative issues at an international level.
