*The Business Research Company's  
Building Inspection Services Global  
Market Report 2022: Market Size, Trends,  
And Forecast To 2026*

LONDON, GREATER LONDON, UK,  
August 23, 2022 /EINPresswire.com/ --

As per The Business Research  
Company's "Building Inspection  
Services Global Market Report 2022",  
the [building inspection services market](#)

[share](#) is expected to grow from \$11.35 billion in 2021 to \$12.82 billion in 2022 at a compound annual growth rate (CAGR) of 13.0%. The building inspection services industry growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$19.75 billion in 2026 at a CAGR of 11.4%. According to the building inspection services market research, rising urbanization around the world is expected to drive the market.

Key Trends In The Building Inspection Services Market

[Building inspection services market trends](#) include companies and governments developing and employing drones for building inspections. Drones, also known as unmanned aerial vehicles (UAVs) or unmanned aircraft systems (UASs) are a flying robot that can be controlled remotely or independently operated through software-controlled flight plans in its embedded systems, working in conjunction with onboard sensors and GPS systems. Drones enable building inspections safer, faster as well as more cost-effective. In October 2020, Singapore analytics and acoustic technologies company H3 Zoom. AI started using drones for building inspection and facility management after realizing that the city's highly urban environment delayed digital technology disruption. Moreover, in September 2020, New York City Council has passed a bill to explore the use of drones for building facade inspections.
