COVID-19 Scenario:

The outbreak of COVID-19 has had a negative impact on the growth of the global antifouling paints and coatings market, owing to the occurrence of lockdowns in various countries across the globe.

Lockdowns resulted in the closure of various manufacturing facilities, including those of antifouling paints and coatings, which had a devastating impact on its demand.

Besides, various shipbuilding and boat building companies were shut down during the pandemic. This was mainly due to the presence of strict social distancing restrictions imposed by the government to significantly curb the spread of the virus during the pandemic.

In addition, all sorts of fishing or shipping activities or sports were cancelled, which further aggravated the impact on the market.

However, the market is expected to recoup soon.

The report offers a detailed segmentation of the global antifouling paints and coatings market based on type, application, and region. The report provides a detailed analysis of each and every segment along with its respective sub-segments with the help of tables and figures. This analysis can essentially guide investors, market players, and new entrants in devising strategies based on the fastest growing segments and highest revenue generating segments that are mentioned in the report.
