

AppSec Phoenix Integrates with CrowdStrike, Rapid7, Nessus, ServiceNow taking Vulnerability Management to the next level

The Gartner ASOC leaders add vulnerability management teaming with leaders in vulnerability detection helping clients 10X the speed of vulnerability fix

LONDON, UNITED KINGDOM, August 23, 2022 /EINPresswire.com/ -- Visibility and context drive faster resolution on the vulnerabilities that matter most. That's the philosophy driving the work of [AppSec Phoenix](#), innovative posture management and risk-based vulnerability management software that puts the power of digital security into the hands of application builders and businesses.

AppSec Phoenix was founded by Francesco Cipollone, an award-winning cybersecurity expert. Cipollone is a thought leader in the applications security, cloud security and vulnerability management arena and has delivered security programming to some of the world's largest brands, including Amazon AWS, HSBC, Nationwide, Vodafone and other financial organizations.

“

The AppSec Phoenix team is pleased to partner with cyber security leaders like CrowdStrike, Qualys, Nessus, and Service Now simplifying Vulnerability management taking security teams to the next level”

Francesco Cipollone

Leveraging his deep industry knowledge, Cipollone founded AppSec Phoenix, a platform that simplifies smart security and risk-based vulnerability management for small- to medium-sized enterprises. The platform employs innovative AI technology and industry insights to secure clients' software. By giving enterprises a simplified tool to

solve complex security issues, AppSec Phoenix saves companies time and money by identifying and closing online loopholes that can cause damage to their reputations as a result of cyberattacks and security breaches.

AppSec Phoenix seamlessly integrates with technologies for early detection of vulnerabilities like [Qualys](#), [CrowdStrike](#), Tenable Nessus, Checkmark, Acunetix and Netsparker, SNYK, and Veracode and Many more. Today we are happy to announce the integration with the major leaders in vulnerability detection and Asset management like Service Now.

With CrowdStrike, Qualys, Nessus, Acunetix and Netsparker, we are happy to cover the last bastion of vulnerability management, offering clients a single pane of glass across infrastructure, cloud, container, and application security. AppSec Phoenix helps the security team and development better control the asset risk posture and prioritize vulnerabilities based on contextual and business data. Integrating these Appsec Phoenix and vulnerability scanners helps organizations consolidate vulnerability management programs across cloud, infrastructure, and container security.

Early adopters who sign up for AppSec Phoenix can receive a heavy discount on their services, limited to the first ten registered organisations.
