

Automatic Gate Opening System Market has estimated 7.5% CAGR During 2022 to 2032

Automatic Gate Opening System Market to Witness 7.5% CAGR through 2032: Persistence Market Research Analysis

NEW YORK CITY, NEW YORK, UNITED STATES, August 24, 2022

/EINPresswire.com/ -- The global "automatic gate opening system market" is anticipated to witness a high growth rate of around 7.5% over the decade. Market expansion is predicted to be driven by increasing usage for providing security features that regulate access to secured areas. These systems are used as an entrance to premises or facilities and also helped in controlling vehicular activity.

Automatic gate openings save time by eliminating the need to physically open gates to get access to a place, whether it's residential or commercial. They are especially useful during rainfall or other inclement weather conditions. Unlocking an electric gate can be done in several ways. Remote control, card readers, and keypads are some of the options, while more advanced automatic gates have sensors that sense certain signals for access.

Automatic gates are sturdy, long-lasting, and come in a variety of sizes. It is a property's first security system, providing a sense of safety. A maglock can be installed on the door for enhanced security. When the door is closed, the maglock is activated by an electromagnet. They can exert a force of 500 kg or more, making it significantly more difficult to open the door.

Key Takeaways from Market Study

Increasing application of automatic barriers across transportation hubs and residential areas to enhance security and safety around these areas is estimated to fuel growth of the automatic barriers market.

Each automatic gate opening system requires motors and an access control system for operations, in which there is more than one access control system implemented for one motor.

Military and industries are major end users of automatic gate opening systems due to the requirement of high security and restrictions at such places.

Automatic bollards are primarily used across high-security areas such as airports, defence sites, industries, hotels, and government buildings, among others. Bollards are now available with lights or glowing tapes at the top to avoid accidents and other related issues.

Military and industries are major end users of automatic gate opening systems due to the requirement of high security and restrictions at such places. The military segment is anticipated to remain key and account for more than 24% market share by value in 2022.

“Upsurge in arrogation of security and regulated access in restricted areas such as military, industries, residential, etc., using different types of gates to restrict unwanted persons, and increasing technological advancements for security reasons, are driving market expansion” says a Persistence Market Research analyst.

Competitive Landscape

The global automatic gate opening system market is consolidated with the presence of key manufacturers along with small-scale manufacturing companies.

Prominent market players included in the report are The Chamberlain Group, FAAC Group, Nice S.p.A, CAME BPT UK, Gandhi Automations Pvt. Ltd., Dtec Entrematic, and others.
