

# Drug Discovery Services Market Size, Share Analysis, Key Companies, and Forecast To 2027

*North America has held the largest share of the Drug Discovery Services Market over the last few years. It is expected to continue to dominate the market*

VANCOUVER, BRITISH COLUMBIA, CANADA, August 24, 2022  
/EINPresswire.com/ -- Global [Drug Discovery Services Market](#) Overview

Discovery and characterization of the novel drug candidate for preclinical development are primarily dependent on innovation, research, and science.

Drug discovery is the process of discovering and designing novel candidates for medication and therapy. The most common drug discovery methods are molecular designing, molecular manipulation, drug metabolites, random screening, and others. However, the discovery process is generally expensive and time-consuming. Drug discovery services are predominantly designed with the purpose of minimizing the costs and time required for the process.

The research report on the Global Drug Discovery Services Market covers thoroughly analyzed insights into the Drug Discovery Services market with a special focus on ever-changing market dynamics, technological advancements, market growth, industry environment, and all the dominating factors of the industry. The report furthermore provides an in-depth analysis of the market growth, market size, and influential factors that affect the growth of the industry. The report also offers insights into how the market is expanding in domestic and international markets and contributing to the global economy.

Drug discovery services find extensive usage in forensic science, paternity testing, anthropology, and disaster victim identification. DNA analysis is a crucial element of this segment. Drug discovery services are an amalgamation of drug-target recognition, drug design, lead optimization, compound recognition, and drug discovery selection. The market for drug discovery services is expanding rapidly due to increased demand for analytical testing and

clinical trials.

The report is an engaging document that provides vital statistical information about the market in terms of sales, revenue, market share, and market size with regards to product types, application spectrum, regional bifurcation, leading players, and technological advancements.

A comprehensive analysis of the competitive landscape is offered in the report along with a study of the company profiles, product portfolio, manufacturing and production capacity, technological developments, R&D advancements, and strategic initiatives of the prominent players of the industry. Prominent players operating in the industry and profiled in the report include :

Albany Molecular Research, Inc.

Thermo Fisher Scientific

Evotec

Covance

GenScript

Pharmaceutical Product Development, LLC

SRI International

WuXiAppTec

Charles River Laboratories International

Selcia Limited

Viva Biotech

Domainex

Merck KGaA

Others

Some notable collaborations in the drug discovery services market are:

In February 2020, Eurofins Discovery and PharmaResources announced a collaboration to build a joint drug discovery platform for accelerating the development of small-molecule drugs.

In June 2020, Covance joined forces with Medable to pace up the adoption of the decentralized clinical trial technology. Covance also introduced a COVID-19 platform for clinical trials in the United States to offer vital information about the COVID-19 trials and accelerate the process of recruitment.

## COVID-19 Impact on the Drug Discovery Services Market

The COVID-19 pandemic has created unprecedented disruptions in the global market for several industry verticals and is anticipated to affect the Drug Discovery Services Market significantly. In a bid to accelerate the research and drug discovery for a viable treatment for the COVID-19 pandemic, numerous pharmaceutical and biotechnology companies are collaborating with drug discovery services companies to develop therapeutics and vaccine candidates to combat the spread of the coronavirus. Rising R&D activities and increasing funding is accelerating the growth of the industry. The report also covers the pandemic's current and future impact on the market and offers an accurate estimation of the market scenario in a post-COVID-19 setting.

The report provides an explicit analysis of the market with regards to growth driving factors, restraining factors, regulatory framework, threats and opportunities, financial hurdles to offer a thorough outlook of the market. The report also covers value chain analysis, market share, market size, CAGR, sales and revenue, import/export, the scope of the market, growth prospects, and other key factors. The report offers a regional analysis that covers key geographies such as North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

The report applies advanced analytical tools such as SWOT analysis, Porter's Five Forces analysis, along with feasibility analysis and investment return analysis. It also offers strategic recommendations to new entrants as well as established companies about market barriers. It also offers insights into futuristic business opportunities, market scope, threats, and obstacles, to enable fruitful business decision-making process.

For the purpose of this report, Emergen Research has segmented into the global Medical Radiation Detection, Monitoring and Safety Market on the product, detectors, application, and region:

## Drug Discovery Services Market Segmentation

### Process

Target Selection

Target Validation

Lead Optimization

Candidate Validation

Others

Type

Medicinal Chemistry

Biology Services

Pharmacokinetics and Drug Metabolism

Drug Type

Biologics

Small Molecules

Therapeutic Area

Neurology

Diabetes

Oncology

Cardiovascular Diseases

Respiratory Illnesses

Others

End-User Industry

Hospital & Clinics

Pharmaceutical Companies

Biotech Companies

Research Institutes

Others

Furthermore, the report renders a complete analysis of the Drug Discovery Services market that allows readers to formulate profitable and lucrative business strategies by offering insights into the competitive landscape, crucial market details, growth prospects, regional rules and regulations, and other key factors.

Radical Findings of the Report:

Overview of the Drug Discovery Services industry with a futuristic outlook

Manufacturing cost analysis and industrial chain analysis

Comprehensive regional analysis

Competitive landscape benchmarking

Drug Discovery Services Market growth trends; current and emerging

Technological and product developments

Exhaustive coverage of Drug Discovery Services market drivers, restraints, opportunities, threats, limitations, and prospects

SWOT Analysis, Porter's Five Forces analysis, feasibility analysis, and investment return analysis

About Us:

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyse consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
