

Automotive Filter Market Analysis, Growth By Top Companies, Trends By Types And Forecast 2017-2024

PORTLAND, ORAGON, UNITED STATES, August 24, 2022 /EINPresswire.com/ -- The growth of the [automotive filter](#) market is driven by regulations laid by the government for environmental safety as well as emission standards put forth by the regulatory bodies. However, adoption of electric vehicle hampers the growth of the automotive fuel & oil filter market. On the contrary, an increase in demand for vehicles in the emerging economies is expected to provide lucrative opportunities for this market.

Automotive filter prevents the entry of dirt particles such as pollens, exhaust fumes, bacteria, and others into the carburetor and engine. This minimizes the air pollutants emitted by vehicles, reduces the maintenance cost, and extends the service life of the vehicle. The government and emission bodies have laid stringent emission laws for the vehicles, which emit hazardous gases such as hydrocarbons (HC), nitrogen oxide (NOx), carbon monoxide (CO), and others. For example, the Environmental Protection Agency (EPA) in the U.S. has amended standards such as national program for greenhouse gas emissions (GHG) and fuel economy standards for light-

duty vehicles (passenger cars and trucks). Similarly, German cities are entitled to ban old diesel vehicles according to the European Union rules to reduce air pollution. These factors are expected to propel the overall growth of the global automotive filter market.
