E-cigarettes generally comprise of electronic circuitry and a power source supplying energy to the heating mechanism, they create vapor by heating rather than the burning related to the usage of regular tobacco-based cigarettes, non-tobacco nicotine-containing liquid is usually utilized consumable to create vapor.

Major factors that are expected to boost the growth of the e-cigarette kits market in the forecast period are the decrease in the cost of the disposable models of e-cigarettes and the growing health awareness amongst the smoking population. Furthermore, the rise in the trend of e-cigarettes is further anticipated to propel the growth of the e-cigarette kits market. Moreover,

the increasing number of vape shops & designated shops is further estimated to cushion the growth of the e-cigarette kits market. On the other hand, the application of strict legal framework is further projected to impede the growth of the e-cigarette kits market in the timeline period.

In addition, the growing eco-friendliness of e-cigarettes will further provide potential opportunities for the growth of the e-cigarette kits market in the coming years. However, the limitations on menthol flavored e-cigarettes and increase in the lobbying by pharmaceutical companies might further challenge the growth of the e-cigarette kits market in the near future.
