

Global Prenatal Testing & Newborn Screening Market Drivers, Trends And Restraints For 2022-2031

*The Business Research Company's
Prenatal Testing & Newborn Screening
Global Market Report 2022: Market Size,
Trends, And Forecast To 2026*

LONDON, GREATER LONDON, UK,
August 25, 2022 /EINPresswire.com/ --

As per The Business Research
Company's "Prenatal Testing &
Newborn Screening Global Market
Report 2022", the market size is

expected to grow from \$4.49 billion in 2021 to \$5.04 billion in 2022 at a compound annual growth rate (CAGR) of 12.2%. The [prenatal testing and newborn screening market growth](#) is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The prenatal testing and newborn screening market share is expected to reach \$7.98 billion in 2026 at a CAGR of 12.2%. According to the prenatal testing and newborn screening industry overview, the high prevalence of genetic diseases in infants contributed to the growth of the market.

Key Trends In The Prenatal Testing & Newborn Screening Market

The use of machine learning and artificial intelligence is gradually gaining popularity shaping the prenatal testing and newborn screening market outlook. Artificial intelligence (AI) is the simulation of human intelligence in machines. Machine learning is a part of AI. Machine learning and AI help companies in the prenatal testing and newborn screening market to conduct a detailed analysis of all relevant data, provide insights about different diseases, and offer a more accurate evaluation of tissue samples. For instance, in 2019, AI specialist FDNA and PerkinElmer Genomics partnered to launch Face2Gene Labs for newborn testing.
