

Airborne Fire Control Radar Market : Air to Air Application to Grow at CAGR 8.2% From 2021-2030

PORTLAND, ORAGON, UNITED STATES, August 25, 2022 /EINPresswire.com/ -- Allied Market Research published a report, titled, "[Airborne Fire Control Radar Market](#) by Frequency Band (X-Band, L And S-Band, Ku/K/Ka-Band), by Platform (Fighter Jets, Combat Helicopters, Others), by Application (Air To Ground, Air To Sea, Air To Air): Global Opportunity Analysis and Industry Forecast, 2020-2030". According to the report, the global airborne fire control radar industry generated \$2.5 billion in 2020, and is anticipated to generate \$4.4 billion by 2030, witnessing a CAGR of 6.2% from 2021 to 2030.

Prime determinants of growth

Growth in usage of active electronically scanning array (AESA) technology, rise in accession of fighter jets to improve aerial strength, and surge in military expenditure in numerous countries drive the growth of the global airborne fire control radar market. However, high maintenance cost hinders the market growth. On the other hand, technological advancements and upsurge in demand from emerging economies to address territorial conflicts present new opportunities in the coming years.

Covid-19 Scenario

The outbreak of the COVID-19 pandemic has had a negative impact on the growth of the global airborne fire control radar market, owing to implementation of global lockdown which led to disruptions in the supply chain, temporary closure of manufacturing facilities, unavailability of labor force, and so on.

However, the market is going to recover soon in 2022.

The X-Band segment to maintain its leadership status throughout the forecast period

Based on frequency band, the X-Band segment held the highest market share in 2020,

accounting for nearly half of the global airborne fire control radar market, and is estimated to maintain its leadership status throughout the forecast period. These types of radars are typically suitable for military applications such as interceptors, fighter jets, and helicopters, which in turn, is acting as a driving factor for the segment. Moreover, the Ku/K/Ka-Band segment is projected to manifest the highest CAGR of 7.8% from 2021 to 2030. Increasing demand for high-resolution, and close-range targeting radars on military aircraft supports the growth of this segment.

The air to ground segment to maintain its lead position during the forecast period

Based on application, the air to ground segment accounted for the largest share in 2020, contributing to nearly half of the global airborne fire control radar market, and is projected to maintain its lead position during the forecast period. This is because developed nations such as the U.S. have started several research and development programs for evolution of technologies to develop advanced air to ground airborne fire control radar. However, the air to air segment is expected to portray the largest CAGR of 8.2% from 2021 to 2030, owing to increasing aerial threats, and military investments promoting the growth of air to air airborne fire control radar systems.

North America, to maintain its dominance by 2030

Based on region, North America, held the highest market share in terms of revenue 2020, accounting for more than two-fifths of the global airborne fire control radar market, owing to high adoption of technology, large number of market players, and high military spending. Moreover, the Asia-Pacific region is expected to witness the fastest CAGR of 7.7% during the forecast period. Growth in security concerns, rising territorial conflicts, and increase in R&D activities supports the growth of this region.

Leading Market Players

Bharat Electronics Limited
Hensoldt AG
Israel Aerospace Industries
Leonardo S.p.A.
Lockheed Martin Corporation
BAE Systems Plc
Northrop Grumman Corporation
Raytheon Technologies Corporation
Saab AB
Thales Group

About Us -

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
