CBD products made from both Hemp or Marijuana contains tetrahydrocannabinol (THC), a psychoactive substance that produces the high. Hemp-derived CBD products have gained higher traction as compared to Marijuana-derived CBD products, because THC concentration in former is 0.3% only, while in the latter it is 15%–40%. Less concentration of THC in Hemp-derived products is the main reason for its legalization in many countries.

Although CBD has wide applications, the scientific researchers in this market are involved in understanding and expanding its scope. CBD-enhanced probiotic supplements are one of the products made from CBD. The benefit of both CBD and SCD is gained in one serving by infusing the CBD extract with SCD probiotics. SCD probiotics have microbes, who have the potential to balance our systems, like the microbiomes in our gut and body. Due to the unique fermentation method, the microbes present in SCD probiotics are more resilient and stronger.

CBD also helps in maintaining gut by supporting proper digestion, keeping intestinal tract healthy, and aiding gut flora and pH. Therefore, supplements formed from the integration of CBD and SCD probiotics prove to be very beneficial for the microbiomes present in the human digestive tract and gut.

Market Key Players:

Companies covered: CBD American Shaman, Green Garden Gold, NewLeaf Brands, Kövo Essentials, Vibrant Health, and Garden of Life.

COVID-19 Scenario Analysis:

The cannabis industry is facing a unique set of challenges.

The cannabis market is expected to lose revenue due to the Corona outbreak.

Prices for cannabinoid products have significantly fallen.

The supply chain has been disrupted, due to restricted transport and store closure.

There is still a scope to capture consumers through online channels.

Trials have been launched in various countries to find out if CBDs properties can be an effective treatment for COVID-19.

Top Impacting Factors: Market Scenario Analysis, Trends, Drivers and Impact Analysis

The growth of the CBD probiotic supplements market is led by the growing awareness among people regarding the health of their immune system, digestive system, and the health issues faced due to increase in stress, while the rise in awareness can be attributed to awareness initiatives taken by various organizations and key players.

The infusion of CBD in probiotic supplements has further pushed the growth to the next level. The CBD-enhanced probiotic supplements prove to be more beneficial and effective in keeping your intestinal tract and digestive system healthy. This market is driven by the legalization of CBD in various regions, and an increase in the R&D for cannabinoid.
