

Assistive Technology for Kansans Demonstrates Toothbrush Pillow An Anthem Pleasant Company

TOPEKA, KS, USA, September 19, 2022
/EINPresswire.com/ -- [Assistive
Technology for Kansans \(ATK\)](#) lending
library of tools, devices, and assistive
technology services for persons with
physical or neurological impairments,
is expanding in a small way.

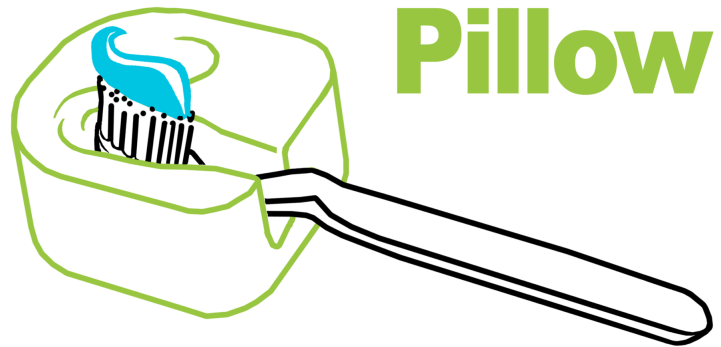

The latest addition to the device
demonstration is the Toothbrush
Pillow, a small countertop HSA & FSA
medical device that balances a
toothbrush in the horizontal position
with bristles up to aid and assist
physically or neurologically impaired
individuals in applying toothpaste. Like
all the numerous devices and services
available from Assistive Technology for
Kansans, the Toothbrush Pillow can be
tried by the user before committing to
its use.

ATK strives to improve access to and
acquisition of assistive technology (AT)
for individuals with disabilities and
health conditions of all ages.

Assistive Technology for Kansans now
has the Toothbrush Pillow thru the AT
Demonstrations centers. This
opportunity is for a person to interact
with an AT device, learn about the

different features and compare with other similar devices. An AT Device Demo allows a person to

KANSAS

make an informed decision about whether the device is the right one.

Kansas TAP Demonstration Centers are located throughout the state with equipment available for you to try. If you are having trouble deciding, AT Specialists are available to talk with you about your AT needs via email, phone, Skype, Zoom, or a variety of other online options. Equipment can be demonstrated and discussed.

According to [CDC.gov](https://www.cdc.gov) 3 percent of Kansas adults have a self-care disability, 11 percent with mobility disability, and 6 percent have an independent living disability. Independent living is described as serious difficulty doing errands alone, such as visiting a doctor's office and self-care is difficulty dressing or bathing.

Funding for Assistive Technology for Kansans (ATK) is available through a government-sponsored program called Assistive Technology Act Programs (ATAP), administered by the U.S. Department of Health and Human Services. HHS works through various state agencies that work closely with individual users impacted by disabling conditions.

The Assistive Technology Industry Association (ATiA) defines Assistive technology (AT) is any item, piece of equipment, software program, or product system that is used to increase, maintain, or improve the functional capabilities of persons with disabilities.

The small Toothbrush Pillow, like thousands of other devices designed to assist disabled and elderly, is available at 39 out of 56 assistive technology locations throughout all 50 states, four US territories, the District of Columbia and Puerto Rico.

About Toothbrush Pillow

The device is currently being used by individuals with Parkinson's, arthritis, Multiple Sclerosis (MS), stroke, Autism, and upper limb amputees. Occupational therapists supply the Toothbrush Pillow and teaches client's proper oral care. The device creates opportunities for individuals with daily oral care when dealing with extraordinary medical issues in the absent of medical doctors. Very economical, easy to use, and can be used independently. The intellectual property behind TBP is owned by American Businessman, Anthem Pleasant.
