

Parkinson's Product Aid, Toothbrush Pillow Demonstrated At Minnesota Assistive Technology Program

SAINT PAUL, MN, USA, November 4, 2022 /EINPresswire.com/ -- Minnesota's System of Technology to Achieve Results (STAR) lending library of tools, devices, and assistive technology services for persons with physical or neurological impairments, is expanding in a small way.

The latest addition to the device demonstration is the Toothbrush Pillow, a small countertop HSA & FSA medical device that balances a toothbrush in the horizontal position with bristles up to aid and assist physically or neurologically impaired individuals in applying toothpaste. Like all the numerous devices and services available from Minnesota's System of Technology to Achieve Results (STAR), the Toothbrush Pillow can be tried by the user before committing to its use.

A System of Technology to Achieve Results (STAR) is located within the Minnesota Department of Administration. STAR's mission is to help all Minnesotans with disabilities gain access to and acquire the assistive technology they need to live, learn, work and play. The Minnesota STAR Program is federally funded by the Department of Health and Human

Assistive Technology

Services, Administration For Community Living in accordance with the Assistive Technology Act of 1998, as amended (P.L. 108-364).

Minnesota 's assistive technology resource (STAR) now has the Toothbrush Pillow thru the AT Demonstrations programs. This opportunity is for a person to interact with an AT device, learn about the different features and compare with other similar devices. An AT Device Demo allows a person to make an informed decision about whether the device is the right one.

According to [CDC.gov](https://www.cdc.gov) 2 percent of Minnesota adults have a self-care disability, 8 percent with mobility disability, and 5 percent have an independent living disability. Independent living is described as serious difficulty doing errands alone, such as visiting a doctor's office and self-care is difficulty dressing or bathing.

The Assistive Technology Industry Association (ATiA) defines Assistive technology (AT) is any item, piece of equipment, software program, or product system that is used to increase, maintain, or improve the functional capabilities of persons with disabilities.

The small Toothbrush Pillow, like thousands of other devices designed to assist disabled and elderly, is available at 46 out of 56 assistive technology locations throughout all 50 states, four US territories, the District of Columbia and Puerto Rico.

About Toothbrush Pillow

The device is currently being used by individuals with Parkinson's, arthritis, Multiple Sclerosis (MS), stroke, Autism, and upper limb amputees. Occupational therapists supply the Toothbrush Pillow and teaches client's proper oral care. The device creates opportunities for individuals with daily oral care when dealing with extraordinary medical issues in the absent of medical doctors. Very economical, easy to use, and can be used independently. The intellectual property behind TBP is owned by American Businessman, Anthem Pleasant.
