

Endoscope + Radiofrequency Ablation (RFA) Market Expected to Reach \$7,471 Million by 2025 | Industry CAGR of 9.6%

Endoscope + radiofrequency ablation (RFA) market provides an in-depth analysis with the current trends and future estimations.

PORTLAND, OREGON, UNITED STATES, August 29, 2022 /

EINPresswire.com/ -- Endoscope + RFA is anticipated to grow at a significant rate during the forecast period, owing to factors, such as increase in the prevalence of cancer and cardiac ailments across the globe, surge in adoption of RFA devices in pain management, and high efficacy and short duration of the procedure. However, high costs associated with the RFA treatment and limited awareness towards available endoscopic RFA devices are anticipated to hamper the [Endoscope + RFA market](#) growth. On the contrary, the emerging indications for the endoscopic radiofrequency ablation are expected to offer lucrative growth opportunities for the market players.

On the basis of application, the market is classified into cardiology application, pain management, oncology application, and other application. Among these, the cardiology application segment accounted for the largest share of the revenue generated in 2017 and is anticipated to maintain this trend throughout the forecast period. However, the oncology application segment is expected to grow at the fastest pace from 2018 to 2025.

North America was the leading revenue contributor to the global market in 2017 and is expected to maintain this dominance throughout the forecast period. This is attributed to the fact that North America is an established market for radiofrequency device ablation technologies,

wherein countries in this region adopt novel RFA devices including endoscope + RFA devices at the earliest. However, Asia-Pacific is expected to grow at the highest CAGR from 2018 to 2025, because this region is home to the world's most diverse population groups and encompasses both developing and underdeveloped economies. With increase in burden of diseases across these countries, Asia-Pacific is anticipated to offer profitable opportunities for the market players focusing on expansion.
