Key Market Analysis and Insights:

Data Bridge Market Research analyses that the dental chairs market will exhibit a CAGR of around 4.75% for the forecast period of 2021-2028. Rising prevalence of dental disorders, increased focus on research and development proficiencies in regards to medical devices and on the adoption of advanced healthcare technologies, growing awareness and concerns in regards to maintaining oral hygiene and rising expenditure for the development of healthcare infrastructure development especially in the developing economies are the major factors attributable to the growth of dental chairs market.

Dental chairs are the devices that act as recliners for the patients. Dental chairs are used worldwide by every dentist. Dental chairs basically comprise of headrest, backrest, armrest, and a seat. Dental chairs provide comfort to the patients and assist the surgeons or dentists to analyse the mouth health and perform necessary operations.

Upsurge in the concerns related to dental aesthetics is one of the major factors fostering the growth of the market. Surging geriatric population base coupled with growing focus to increase patient comfort while designing these dental chairs is another market growth determinant. Growing number of dental surgeries and rising medical tourism are other important factors that will further generate lucrative market growth opportunities.
