

Global Nonresidential Building Construction Market Drivers, Trends And Restraints For 2022-2031

*The Business Research Company's
Nonresidential Building Construction
Global Market Report 2022: Market Size,
Trends, And Forecast To 2026*

LONDON, GREATER LONDON, UK,
August 30, 2022 /EINPresswire.com/ --
As per The Business Research
Company's "Nonresidential Building
Construction Global Market Report
2022", the nonresidential building

construction market size is expected to grow from \$2.67 trillion in 2021 to \$2.99 trillion in 2022 at a compound annual growth rate (CAGR) of 11.8%. The [nonresidential building construction market growth](#) is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The non-residential building construction market is expected to reach \$4.48 trillion in 2026 at a CAGR of 10.7%. A rapidly growing urban population is expected to increase the demand for new residential and commercial buildings, during the forecast period.

Key Trends In The Nonresidential Building Construction Market

Nonresidential building construction industry trends include companies increasingly using green construction techniques to build energy efficient buildings and reduce construction costs. Green construction refers to the practice of using sustainable building materials and construction processes to create energy-efficient buildings with minimal environmental impact. According to World Green Building Trends Survey, about 60% of construction firms across the globe were involved in green construction projects. Certifications such as Leadership in Energy and Environmental Design (LEED) help construction companies to develop high-performance, sustainable residential and commercial buildings, and also offer a variety of benefits, from tax
