Market Growth

Chronic diseases are common health problems around the world. Globally, one in three adults suffers from chronic diseases. Chronic diseases have affected the health and quality of life of many people. Chronic diseases, including cancer, musculoskeletal & neurological disorders, chronic trauma, and cardiovascular & gastrointestinal diseases, can lead to hospitalization, long-

term disability, reduced quality of life, and death. Mesenchymal stem cells infiltrate and integrate into many organs, repair damage to the heart, lungs, and spinal cord, and improve the condition of autoimmune diseases, liver, bone, and cartilage diseases. Stem cells are a powerful tool for treating diseases caused by inflammation, weakened immune system, and tissue degeneration. For example, in 2021, according to data from the World Health Organization (WHO), around 1.7 billion people worldwide have musculoskeletal disorders. Low back pain causes the burden of musculoskeletal conditions. All of these aspects are likely to drive the global autologous cell therapy market.

Market Segmentation Overview

Autologous cell therapy is a therapeutic intervention using stem cells, where a patient's stem cells are cultured and grown outside the body. The cells were then reintroduced into the same patient's body. This therapy carries fewer risks because the reintroduced cells are less likely to be rejected because they come from the same person. Over the years, autologous cell therapy has been used to treat many chronic diseases such as various forms of cancer and even blood disorders such as thalassemia. The increase in the number of people suffering from serious diseases has increased the demand for autologous cell therapy, driving the growth of the global autologous cell therapy market. Autologous cell therapy poses a moderate complexity risk compared to other treatments, a key growth driver of the autologous cell therapy market. However, the high treatment cost of autologous cell therapy is holding back the growth of the autologous cell therapy market. However, this constraint can be lifted if there is State intervention [AT1] in reimbursement by health insurance.

Some key players of the global Autologous Cell Therapy market are:

Bayer AG
Daiichi Sankyo Co. Ltd.
Takeda Pharmaceutical Co. Ltd.
Teva Pharmaceutical Industries Ltd.
Holostem Terapie Avanzate Srl
Vericel Corp.
Osiris Therapeutics Inc.
Brainstorm Cell Therapeutics Inc.
Sumitomo Chemical Co. Ltd.
FUJIFILM Holdings Corp.

This report segments the global Autologous Cell Therapy market into:

Global Autologous Cell Therapy Market: By Source

- Bone Marrow
- Epidermis
- Mesenchymal Stem Cells
- Hematopoietic Stem Cells
- Chondrocytes

Global Autologous Cell Therapy Market: By Application

- Cancer
- Neurodegenerative Diseases
- Wound Healing
- Orthopedic
- Cardiovascular Diseases
- Autoimmune Diseases

Global Autologous Cell Therapy Market: By End-use

- Hospital
- Clinics
- Others

Global Autologous Cell Therapy Market: Regional Analysis

- North America
 - The U.S.
 - Canada
- Europe
 - France
 - The UK
 - Spain
 - Germany
 - Italy
 - Rest of Europe
- Asia Pacific
 - China
 - Japan
 - India
 - South Korea
 - Southeast Asia

Rest of Asia Pacific
Latin America
Brazil
Mexico
Rest of Latin America
Middle East & Africa
GCC
South Africa
Rest of Middle East & Africa

About Us:

[Zion Market Research](#) is an obligated company. We create futuristic, cutting-edge, informative reports ranging from industry reports, the company reports to country reports. We provide our clients not only with market statistics unveiled by avowed private publishers and public organizations but also with vogue and newest industry reports along with pre-eminent and niche company profiles. Our database of market research reports comprises a wide variety of reports from cardinal industries. Last but not the least, we make it our duty to ensure the success of clients connected to us—after all—if you do well, a little of the light shines on us.
