

Market For Smart Packaging Expected to Reach 6.58% By 2029

Smart Packaging Market is Booming Worldwide, Growth Prospects, Trends and Demand, Insights and Forecast 2029

PUNE, MAHARASHTRA, INDIA, August 30, 2022 /EINPresswire.com/ -- The universal [Smart Packaging](#) report explains a thorough study of current situation of the global market along with several market dynamics. This market research report proves to be a precious source of information with

which businesses can achieve a telescopic view of the current Smart Packaging market trends, consumer's demands and preferences, market situations, opportunities and market status. Moreover, it also contains all the information including market definition, classifications, key developments, applications, and engagements along with the detailed actions of key players with respect to product launches, joint ventures, developments, mergers and acquisitions and effects of the same in terms of sales, import, export, revenue, and CAGR values. With the Smart Packaging market study and market analysis conducted in the wide ranging Smart Packaging business report, it becomes easy to figure out types of consumers, their views about the product, their buying intentions and their ideas for advancement of a product.

[Market Analysis and Insights of Smart Packaging Market](#)

Smart packaging market is expected to gain market growth in the forecast period of 2022 to 2029. Data Bridge Market Research analyses the market to grow at a CAGR of 6.58% in the above-mentioned forecast period.

Smart packaging is basically packaging integrated with different technologies like biosensors and

radio frequency identification technology. It is a collection of advanced packaging methods and integration of various innovative technological methods that are applicable in packaging of contents that are sensitive in nature and require better traceability. The smart packaging solutions enable the consumers to gather greater information on the quality and freshness of the contents helping improve the convenience and safety levels and even can extend the overall shelf life of the contents in an efficient manner.

The increasing demands for temperature controlled packaging solutions from the food and beverages and pharmaceutical industries due to their temperature sensitive contents is driving the growth in the market value. Moreover, companies which are in this business now-a-days are using labels for parts identification, branding which further induce the demand for the market. However, the high costs of implementation and production initially will create hindrances for the market growth rate.

The number of technologically advanced innovations presented by the major market players provide profitable opportunities for the growth of the market. The Lack of awareness amongst the various consumers which is resulting in lack of preference for these smart solutions, is projected to further dampen the market growth rate, resulting in generating challenges for the market's growth rate.

This smart packaging market report provides details of new recent developments, trade regulations, import export analysis, production analysis, value chain optimization, market share, impact of domestic and localized market players, analyses opportunities in terms of emerging revenue pockets, changes in market regulations, strategic market growth analysis, market size, category market growths, application niches and dominance, product approvals, product launches, geographic expansions, technological innovations in the market. To gain more info on smart packaging market contact Data Bridge Market Research for an Analyst Brief, our team will help you take an informed market decision to achieve market growth.

[Global Smart Packaging Market Scope and Market Size](#)

Smart packaging market is segmented on the basis of type, packaging technology, packaging functionality and end user vertical. The growth amongst these segments will help you analyze meagre growth segments in the industries, and provide the users with valuable market overview and market insights to help them in making strategic decisions for identification of core market applications.

Smart packaging market on the basis of type has been segmented into active packaging, intelligent packaging, interactive packaging, controlled permeability packaging and modified atmosphere packaging. Active packaging has been segmented into antimicrobial, gas scavengers, moisture control, corrosion control and others. Gas scavengers are further segmented into oxygen scavengers, carbon dioxide scavengers and generators and ethylene (ethane) scavengers. Intelligent packaging is sub-segmented as indicators and tracking devices.

Indicators are further sub-segmented into time-temperature indicators, gas indicator, quality indicators and thermochromic ink. Tracking devices are also further segmented into radio frequency identification detection (RFID) and near-field communication (NFC). Modified atmosphere packaging has been segmented into active modified atmosphere packaging and passive modified atmosphere packaging.

On the basis of packaging technology, the market has been categorized as indicators, sensors and data carriers. Sensors have been sub-segmented as biosensors and gas sensors. Data carriers have been sub-segmented into bar codes, radio frequency identification detection (RFID), 2D matrix codes, quick response codes and augmented matrix codes.

Based on packaging functionality, the smart packaging market consists of protection, containment, communication and convenience.

Smart packaging market has also been segmented based on end use vertical into food, beverage, healthcare, personal care, automotive, logistics and others. Others consist of electronic goods.

List of Prominent Players in the Smart Packaging Market: 3M, Sealed Air, Bemis Company, Inc., Point Five Packaging, LLC, Mocon Denmark Holding ApS, Praxair Technology, Inc., Amcor plc, Avery Dennison Corporation, R.R. Donnelley & Sons Company, Stora Enso, DuPont de Nemours, Inc., American Thermal Instruments, Crown, Ampacet Corporation, Multisorb, Timestrip UK Ltd., ULMA Group, WestRock Company, UPM, LCR Hallcrest

Market Analysis:

Smart packaging is basically packaging integrated with different technologies like biosensors and radio frequency identification technology. It is a collection of advanced packaging methods and integration of various innovative technological methods that are applicable in packaging of contents that are sensitive in nature and require better traceability. The smart packaging solutions enable the consumers to gather greater information on the quality and freshness of the contents helping improve the convenience and safety levels and even can extend the overall shelf life of the contents in an efficient manner.

The increasing demands for temperature controlled packaging solutions from the food and beverages and pharmaceutical industries due to their temperature sensitive contents is driving the growth in the market value. Moreover, companies which are in this business now-a-days are using labels for parts identification, branding which further induce the demand for the market. However, the high costs of implementation and production initially will create hindrances for the market growth rate.

The number of technologically advanced innovations presented by the major market players provide profitable opportunities for the growth of the market. The Lack of awareness amongst the various consumers which is resulting in lack of preference for these smart solutions, is projected to further dampen the market growth rate, resulting in generating challenges for the market's growth rate.

Market Opportunities:

Growth in the awareness about the benefits of Smart Packaging Market

Increasing demand for Smart Packaging

Rising research and development opportunities

Table of Content: Global Smart Packaging Market Research Report

Chapter 1: Global Smart Packaging Industry Overview

Chapter 2: Global Economic Impact on Global Smart Packaging Market

Chapter 3: Global Market Size Competition by Industry Producers

Chapter 4: Global Productions, Revenue (Value), according to Regions

Chapter 5: Global Supplies (Production), Consumption, Export, Import, geographically

Chapter 6: Global Productions, Revenue (Value), Price Trend, Product Type

Chapter 7: Global Market Analysis, on the basis of Application

Chapter 8: Market Industry Value Chain

Chapter 9: Market Chain, Sourcing Strategy, and Downstream Buyers

Chapter 10: Strategies and key policies by Distributors/Suppliers/Traders

Chapter 11: Key Economic Indicators, by Market Vendors

Chapter 12: Market Effect Factors Analysis

Chapter 13: Global Smart Packaging Market Forecast Period

Chapter 14: Future of The Market

Chapter 15: Appendix
