Besides, extensive rise in the cross-border conflict, broadening the number of the existing military monitoring & controlling technology and their further upgradation based on specific needs, and asymmetric warfare along with intercountry border conflicts are some of the additional reasons behind the remarkable growth of the market. The ability of the Nano drones to take off and land vertically from or onto a tiny little space helps the user of the drone operate within a smaller vicinity having no considerable landing or take off area required. These have been considered as a preferable option to the applications of mostly inspections where a higher precision maneuvering & ability to keep firm a visual on a single, special target for extended periods is
