Market Growth

Factors such as investment in research and development of new medical nutrition products targeting different health conditions and funding by other companies operating in the nutrition industry are expected to drive the growth of the global enteral nutrition market throughout the forecast period. For example, in May 2020, Danone's

health nutrition arm, Nutricia, awarded USD 1.1 million to the Global Nutrition Research Program, a research project led by clinicians initiated in 16 countries around the world to define nutritional care guidelines for COVID-19 patients recovering from intensive care (ICU) admission.

## Market Segmentation Overview

Enteral nutrition refers to any method of eating that involves the passage of food through the digestive tract to meet an individual's caloric needs. In addition, this may also include a regular diet, the use of liquid or powdered supplements, and tube feeding. There are many different devices and devices available to patients for enteral nutrition. These include tubes, pumps, and other flexible tubes that help facilitate fluid flow directly into the digestive tract. Enteral nutrition is essential for people with diabetes, malnutrition, cancer, digestive disorders, and other complications. Alternatively, enteral nutrition may be provided to patients with nutritional deficiencies. An increase in chronic diseases, such as cancer, stroke, multiple sclerosis, dementia, chronic liver disease, chronic obstructive pulmonary disease (COPD), and diabetes is expected to drive demand for products that help patients with oral absorption problems.

Furthermore, the increase in preterm births is one of the crucial factors driving the demand for enteral formula milk to meet the nutritional needs of infants. In addition, the lack of understanding and awareness of clinical nutrition in the medical and healthcare communities has limited its adoption and development. Technological advancement and product innovation are other factors driving the global enteral nutrition market growth.

Some key players of the global Enteral Nutrition market are:

B. BRAUN MELSUNGEN AG  
ABBOTT LABORATORIES  
FRESENIUS KABI AG  
DANONE S.A.  
HORMEL FOODS CORPORATION

This report segments the global Enteral Nutrition market into:

#### Global Enteral Nutrition Market: By Protein Composition

- Standard Protein Diet
- High Protein Supplement
- Protein for Diabetes Care Patient
- Others

#### Global Enteral Nutrition Market: By Form

- Powder
- Liquid

#### Global Enteral Nutrition Market: By Age Group

- Adults (Above 18)
- Pediatric (Below 18)

#### Global Enteral Nutrition Market: By Distribution Channel

- Hospital Sales
- Retail
- Online

#### Global Enteral Nutrition Market: Regional Analysis

##### North America

- The U.S.

- Canada

##### Europe

- France

- The UK

- Spain

- Germany

- Italy

- Rest of Europe

##### Asia Pacific

- China

- Japan

- India

- South Korea

- Southeast Asia

Rest of Asia Pacific  
Latin America  
Brazil  
Mexico  
Rest of Latin America  
Middle East & Africa  
GCC  
South Africa  
Rest of Middle East & Africa

About Us:

[Zion Market Research](#) is an obligated company. We create futuristic, cutting-edge, informative reports ranging from industry reports, the company reports to country reports. We provide our clients not only with market statistics unveiled by avowed private publishers and public organizations but also with vogue and newest industry reports along with pre-eminent and niche company profiles. Our database of market research reports comprises a wide variety of reports from cardinal industries. Last but not the least, we make it our duty to ensure the success of clients connected to us—after all—if you do well, a little of the light shines on us.
