The key highlights of the report include:

Market Overview (2017-2027)

Forecast CAGR (2022-2027): 8.2%

The marketplace for legionella testing is being aided by the growing prevalence of legionella outbreaks in various buildings, like hotels, cruise ships, and hospitals. because the COVID-19 infection caused by the novel SARS-CoV-2 was almost like Legionnaires' disease, mostly affecting people with weak immune systems, the demand for legionella testing significantly surged.

The shutdown of producing operations and businesses for an extended period of your time thanks to the implementation of government-mandated lockdowns during the pandemic led to the stagnancy of potable water, thanks to which the demand for legionella testing increased to stop the danger of Legionnaires' disease among the workers and consumers, therefore augmenting the market growth. The trend is predicted to continue within the forecast period due to the resurgence of the virus and constant mutation of SARS-CoV-2, resulting in more fatal outcomes, which is projected to propel market growth.

Industry Definition and Major Segments

Legionella testing refers to the detection of the presence of legionella bacteria in humans and water bodies. It's essential in hot and stagnant water to stop the danger of legionella outbreak, which may potentially be fatal to high-risk individuals. Legionella testing is usually done by deploying antigen and molecular testing methods, during which a sample of urine or sputum is collected to be analysed during a laboratory.

On the Basis of application, the market can be divided into:

- Water Testing
- Microbial Culture
- DFA Stain
- PCR
- Others
- IVD Testing
- Blood Culture
- Urine Antigen Test
- DFA Stain
- PCR
- Others

On the Basis of region, the market can be divided into:

- North America
- Europe
- The Asia Pacific
- Latin America
- Middle East and Africa

Market Trends

The increasing prevalence of varied microbes in water which will cause adverse health issues is surging the demand for water treatment. This is often also increasing the presence of legionella which will colonise artificial water systems and equipment, hence surging the demand for managing potable water. The growing demand for legionella testing in public-accessed buildings, care facilities and hospitals, along with fountains and cooling towers, is propelling the market growth.

Additionally, the introduction of varied initiatives by both governments and organisations to extend awareness regarding the danger of legionella growth is further augmenting the industry growth. As an example, the UK government instructed all businesses and other services to initiate vital checks like legionella testing to stop the danger of Legionnaires' disease in March 2021. Such initiatives are projected to bolster market growth within the upcoming years.

Key Market Players

The major players in the market are Abbott Laboratories, Alere Inc., Becton, Dickinson and Company (BD), Bio-Rad Laboratories, Inc., bioMerieux S.A., and Others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
