The global OTC braces and supports market was valued at \$649.71 million in 2019, and is estimated to reach \$991.80 million by 2030, growing at a CAGR of 5.0% from 2021 to 2030. Braces tend to be used for a variety of medical conditions and are designed for different degrees of support or protection. They are primarily concerned about giving support structurally, functionally or for re-positioning and stabilization of the joints. Generally, support braces or splints are used in the field of orthopedics as a result of aging in conditions, such as osteoarthritis, due to traumatic injuries, or in sports injuries where they may be used to treat an injury. In cases, such as ankle braces and knee braces, supports are often used to prevent injury or with pre-existing sports injuries to prevent a recurrence of the knee or ankle injury.

Impact Analysis – OTC Braces and Supports Market Research

Analysts at Allied Market Research constantly monitor the OTC Braces and Supports industry factors with impacts of current events; with this study an update of how industry players have tackled latest scenario and what key strategies have made significant difference is showcased.

Key Highlights from OTC Braces and Supports Market Study.

Revenue and Sales Estimation – Historical Revenue and sales volume is presented and further data is triangulated with top-down and bottom-up approaches to forecast complete market size and to estimate forecast numbers for key regions covered in the report along with classified and well recognized Types and end-use industry.
