PORTLAND, OREGON, UNITED STATES, August 30, 2022 /EINPresswire.com/ --

Antibacterial drugs inhibit bacterial growth for the preventions and treatment of bacterial infections. Antibacterial antibiotic drugs represents the most remarkable portion of antibiotic therapy. The global [antibacterial therapeutic market](#) has observed tremendous growth over

the past few decades owing to increasing use of antibiotics in the treatment of bacterial infections. However, the misuse or overuse of antibiotics has led to the emergence of resistant strains of bacteria. This represents the unmet market need for innovative antibacterial therapy, as rising number of infections that are complicated to treat, pose a significant public health threat.
