The key highlights of the report include:

Historical Market Size (2020): USD 84.4 Billion
Forecast CAGR (2021-2026): 15.3%
Forecast Market Size (2026): USD 198.3 Billion
Market Overview (2016-2026)

Electronic health records (EHR) held a major proportion of the market and are expected to increase steadily during the projection period. The expansion can be attributed to EHR's provision of complete, accurate, and up-to-date information about patients at the point of service. EHR helps clinicians diagnose patients more efficiently and effectively, eliminate medical

errors, and deliver safer treatment by ensuring the security of the information exchange system.

Furthermore, with streamlined coding and invoicing, EHR promotes legible, comprehensive, and accurate documentation. As a result, these factors, combined with growing awareness of the healthcare convenience provided by EHR, are expected to be the market's driving forces over the forecast period. Meanwhile, due to its potential to provide quality healthcare wherever telecommunication technologies are accessible, the telehealth industry is expected to take a significant portion of the market.

Industry Definition and Major Segments

The application of information and communication technology (ICT) in the field of healthcare is referred to as eHealth. It enables for the enhancement of healthcare infrastructure and the provision of increased healthcare services via computers, the internet, and mobile devices.

Based on their type, they can be categorised as:

- Electronic Health Records (EHR)
- VNA and PACS
- Laboratory Information Systems (LIS)
- Telehealth
- Prescribing Solutions
- Medical Apps
- Clinical Decision Support Systems (CDSS)
- Pharmacy Information Systems
- Others

On the basis of end-user, the market is segmented into:

- Healthcare Providers
- Payers
- Healthcare Consumers
- Others

On the basis of region, the market is segmented into:

- North America
- Europe
- Asia
- Latin America
- Middle East and Africa

Market Trends

The expanding digitisation of healthcare is driving the worldwide eHealth industry, which aims to improve patient comfort. The use of sophisticated technologies speeds up the diagnostic process, protects patient data, and lowers healthcare expenses, while also providing patients with dependable, simplified, and accurate documentation.

Patients can use mhealth applications and telemedicine services to monitor numerous health metrics from the comfort of their own homes thanks to eHealth. The increased adoption of computers, cell phones, laptops, and tablets are expected to drive demand for eHealth over the forecast period.

Key Market Players

The major players in the market are General Electric Company, Allscripts Healthcare LLC, IBM Corporation, UnitedHealth Group, Teladoc Health Inc., Siemens Healthcare GmbH, and Others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
