## Market Growth

With the growing urbanization and modernization of cities, we are always in close contact with explosive substances or skin irritants. They can range anything from cleaning agents to chemicals used at construction sites, high voltage electric currents, and fuels, to name a few. A slight ignorance can lead to serious burn cases. For example, if safety procedures are not correctly followed at construction sites, there is a chance of a live unexposed wire coming in contact with a human. Or careless attitude at chemical manufacturing sites may have negative implications. Since we are always in proximity to such strong burn agents, the chances of burns have become higher than ever and are expected to aid global [burn care market](https://www.zionmarketresearch.com/report/burn-care-market) growth in the coming years.

## Market Segmentation Overview

A burn occurs when the skin tissue is damaged due to exposure to chemicals, heat, electricity, sunlight, or radiation. Most burn cases are accidental situations. The seriousness of the burn is determined by the diagnosing medical professional and in case of any type of burn, it should be quickly reported to the doctor in order to reduce the impact of the burn because untreated burns readily lead to infections and can become critical in many cases.

Around half a million burn cases are reported annually across the globe with varying intensity where children are the most at risk. Anybody can be a victim of accidental burns like children getting burnt because of boiling water or oil spillage on the skin, teenagers may accidentally burn a patch of their skin when messing around with lighters, and other such situations. Burns are generally categorized into 3 types: first-degree burn which is the mildest form and even sunburn is included in this category, second-degree burn which affects the top & lower level of the skin (dermis), third-degree burn which damages all three layers of the skin including epidermis, dermis, and fat. It also affects the sweat glands & hair follicles and has proven to be fatal in many situations. Some of the signs of burns are blisters, swelling, pain, peeling skin, and white or charred skin.

Some key players of the global Burn Care Market Market are:

Cardinal Health

3M

ConvaTec Inc.

Integra LifeSciences Corporation

DeRoyal Industries Inc.

Mölnlycke Health Care AB.

Coloplast Corp.

Johnson & Johnson  
Smith & Nephew  
Medline Industries  
Acelity LP
